Facilitating the Therapeutic Relationship is the first textbook of its kind to comprehensively cover both sides of the therapeutic relationship. Students and clinicians alike will appreciate this unique approach that addresses not only the counseling attitude that is vital to the growth and progress of clients but also the self-awareness that guides the personal development of the clinician. Included with the text are online supplemental materials for faculty use in the classroom.

Mindfulness in Good Lives Mike W. Martin, 2019-10-23 Mindfulness is celebrated everywhere especially in health psychology and spiritual practices but also in the arts business education environmentalism sports and the use of digital devices. While the current mindfulness movement may be in part the latest fad in a narcissistic and therapeutic culture it is also worthy of greater philosophical attention. As a study in ethics and moral psychology Mindfulness in Good Lives remedies the neglect of this subject within philosophy. Mike W. Martin makes sense of the striking variety of concepts of mindfulness by connecting them to the core idea of value based mindfulness paying attention to what matters in light of relevant values. When the values are sound mindfulness is a virtue that helps implement the kaleidoscope of values in good lives. Health psychologists who currently dominate the study of mindfulness often present their research as value neutral science. Yet they invariably presuppose moral values that should be made transparent. These values which lie at the interface of morality and mental health form bridges between philosophy and psychology and between literature and spirituality.

The Encyclopedia of Work-related Illnesses, Injuries, and Health Issues Ada P. Kahn, 2004 Presents articles on health in the workplace including injuries physical and mental illnesses worker's compensation and social issues.

The Psychotherapy of Personality Disorders Lisa J. Cohen, 2022-05-05 In The Psychotherapy of Personality Disorders Lisa J. Cohen introduces Emergent Systems Theory an integrative model of the many different types of psychotherapy with an emphasis on personality pathology. This model proposes five general levels of the mind brain each of which dates back to a different point in human evolutionary history and has its own distinct psychological functions and psychopathology. This book argues that formulating patients psychological difficulties in terms of the levels involved permits systematic selection of the most appropriate treatments and can also enhance communication across the mental health field.
