Cognitive Agents for Virtual Environments Frank Dignum, Cyril Brom, Koen V. Hindriks, Martin Beer, Deborah Richards, 2013-02-26 This book constitutes the refereed post proceedings of the First International Workshop on Cognitive Agents for Virtual Environments CAVE 2012 held at AAMAS 2012 in Valencia Spain in June 2012 The 10 full papers presented were thoroughly reviewed and selected from 14 submissions In addition one invited high quality contribution has been included The papers are organized in the following topical sections coupling agents and game engines using games with agents for education visualization and simulation and evaluating games with agents

Artificial Intelligence for Computer Games Pedro Antonio González-Calero, Marco Antonio Gómez-Martín, 2011-03-01 The book presents some of the most relevant results from

academia in the area of Artificial Intelligence for games It emphasizes well theoretically supported work supported by developed prototypes which should lead into integration of academic AI techniques into current electronic entertainment games The book elaborates on the main results produced in Academia within the last 10 years regarding all aspects of Artificial Intelligence for games including pathfinding decision making and learning A general theme of the book is the coverage of techniques for facilitating the construction of flexible not prescribed AI for agents in games Regarding pathfinding the book includes new techniques for implementing real time search methods that improve the results obtained through AI as well as techniques for learning pathfinding behavior by observing actual players Regarding decision making the book describes new techniques for authoring tools that facilitate the construction by game designers typically nonprogrammers of behavior controlling software by reusing patterns or actual cases of past behavior Additionally the book will cover a number of approaches proposed for extending the essentially pre scripted nature of current commercial videogames AI into a more interactive form of narrative where the story emerges from the interaction with the player Some of those approaches rely on a layered architecture for the character AI including beliefs intentions and emotions taking ideas from research on agent systems The book also includes chapters on techniques for automatically or semiautomatically learning complex behavior from recorded traces of human or automatic players using different combinations of reinforcement learning case based reasoning neural networks and genetic algorithms

Core Techniques and Algorithms in Game Programming Daniel Sánchez-Crespo Dalmau, 2004 To even try to keep pace with the rapid evolution of game development you need a strong foundation in core programming techniques not a hefty volume on one narrow topic or one that devotes itself to API specific implementations Finally there s a guide that delivers As a professor at the Spanish university that offered that country s first master s degree in video game creation author Daniel Sanchez Crespo recognizes that there s a core programming curriculum every game designer should be well versed in and he s outlined it in these pages By focusing on time tested coding techniques and providing code samples that use C and the OpenGL and DirectX APIs Daniel has produced a guide whose shelf life will extend long beyond the latest industry trend Code design data structures design patterns AI scripting engines 3D pipelines texture mapping and more They re all covered here in clear coherent fashion and with a focus on the essentials that will have you referring back to this volume for years to come

Agents for Games and Simulations II Frank Dignum, 2011-01-19 While today s game engines and multi agent platforms cross fertilize each other to some extent the technologies used in these areas are not readily compatible due to some differences in their primary concerns Where game engines prioritize efficiency and central control multi agent platforms focus on agent autonomy and sophisticated communication capabilities This volume gives an overview of the current state of the art for people wishing to combine agent technology with serious games This state of the art survey contains a collection of papers presented at AGS 2010 the Second International Workshop on Agents for Games and Simulations held on May 10 2010 in

Toronto as well as extended versions of papers from other workshops and from the AAMAS conference The 14 papers are organized in three topical sections focusing on architectures combining agents and game engines on the training aspects of the games on social and organizational aspects of games and agents respectively **Game Programming Gems 6** Michael Dickheiser, 2006 One CD ROM disc in pocket Game Design Paul Schuytema, 2007 The author teaches game design from concept to delivery through the creation of a sample game using a simple scripting language called Lua and a DX9 game shell Techniques covered are applicable across the PC and game console platforms Game design industry veterans reveal their secrets in sidebars throughout the book and techniques are illustrated with b w screen shots The accompanying CD ROM contains the demo game a 2D game engine Lua scripts and other tools *Proceedings of the Sixth Australasian Conference on Interactive Entertainment* Malcolm Ryan, IE '09: The 6th Australasian Conference on Interactive Entertainment, 2009 IE 09 The 6th Australasian Conference on Interactive Entertainment Dec 17 2009 Dec 19 2009 Sydney Australia You can view more information about this proceeding and all of ACM's other published conference proceedings from the ACM Digital Library <http://www.acm.org/dl> Game Programming in C++ Erik Yuzwa, 2006 Written for hobbyists beginning developers and students the text includes exercises to build a complete 3D asteroid game A variety of tools are used throughout including Visual Studio .NET and DirectX Paintshop Pro 3ds Max and the Panda XFile exporter tool
