“All-Electric” Narratives Rachele Dini, 2021-10-07 Winner of the 2023 Emily Toth Award for Best Single Work in Women's Studies All Electric Narratives is the first in depth study of time saving electrical appliances in American literature. It examines the literary depiction of refrigerators vacuum cleaners oven ranges washing machines dryers dishwashers toasters blenders standing and hand held mixers and microwave ovens between 1945 when the all electric home came to be associated with the nation's hard won victory and 2020 as contemporary writers consider the enduring material and spiritual effects of these objects in the 21st century. The appropriation and subversion of the rhetoric of domestic electrification and time saving comprises a crucial but overlooked element in 20th century literary forms and genres including Beat literature Black American literature second wave feminist fiction science fiction and postmodernist fiction. Through close readings of dozens of literary texts alongside print and television ads from this period Dini shows how U S writers have unearthed the paradoxes inherent to claims of appliances capacity to give back time to their user transport them into a technologically progressive future or return them to some pastoral past. In so doing she reveals literary appliances role in raising questions about gender norms and sexuality racial exclusion and erasure class anxieties the ramifications of mechanization the perils and possibilities of conformity the limitations of patriotism and the inevitable fallacy of utopian thinking while both shaping and radically disrupting the literary forms in which they operated.

Artifacts from Modern America Helen Sheumaker, 2017-11-03 This intriguing book examines how material objects of the 20th century ranging from articles of clothing to tools and weapons communication devices and toys and games reflect dominant ideas and testify to the ways social change happens. Objects of everyday life tell stories about the ways everyday Americans lived. Some are private or personal things such as Maidenform brassiere or a pair of patched blue jeans. Some are public by definition such as the bus Rosa Parks boarded and refused to move back for a white passenger. Some material

things or inventions reflect the ways public policy affected the lives of Americans such as the Enovid birth control pill. An invention like the electric wheelchair benefited both the private and public spheres; it eased the lives of physically disabled individuals and it played a role in assisting those with disabilities to campaign successfully for broader civil rights. Artifacts from Modern America demonstrate how dozens of the material objects, items, technologies, or inventions of the 20th century serve as a window into a period of history. After an introductory discussion of how to approach material culture, the world of things to better understand the American past, essays describe objects from the previous century that made a wide-ranging or long-lasting impact. The chapters reflect the ways that communication devices, objects of religious life, household appliances, vehicles, and tools and weapons changed the lives of everyday Americans. Readers will learn how to use material culture in their own research through the book's detailed examples of how interpreting the historical, cultural, and social context of objects can provide a better understanding of the 20th-century experience. *Popular Science*, 2002-12. *Popular Science* gives our readers the information and tools to improve their technology and their world. Following introductory overviews of the feedstocks, environmental issues, and life cycle assessment for alternative hydrocarbon fuel processing, sections go on to review solid, liquid, and gaseous fuel conversion. Solid fuel coverage includes reviews of liquefaction, gasification, pyrolysis, and biomass catalysis. Liquid fuel coverage includes reviews of sulfur removal, partial oxidation, and hydroconversion. Gaseous fuel coverage includes reviews of Fischer-Tropsch synthesis, methanol and dimethyl ether production, water-gas shift technology, and natural gas hydrate conversion. The final section examines environmental degradation issues in fuel processing plants as well as automation, advanced process control, and process modelling techniques for plant optimisation.
