Tree pruning is the removal of unwanted branches from a tree such as those shown on Fig. 11a either for reducing risk and inconvenience to the public, maintaining or improving tree health and structure, or improving appearance of trees. Improper tree pruning is detrimental to the appearance and healthy growth of trees and may result in irreparable damage to trees. These general guidelines provide basic information on tree pruning and issues requiring particular attention during execution of works. Tree pruning should be carried out by trained personnel and under proper supervision by experienced persons with expertise in horticulture, arboriculture and tree care.

- (b) **Maintaining or Improving Health and Structure of Trees**
