Ethical Practices for Sustainable Construction Digitalisation

Olugbenga Oladinrin,Douglas Aghimien,Steve Goodhew,2025-09-30 This volume provides a framework for ethical and sustainable digitalization in the construction industry The fourth industrial revolution has significantly changed how industries worldwide operate and deliver their products and services This paradigm shift has brought with it ubiquitous emerging physical biological and digital technologies that are disrupting activities in industries across the globe The construction industry is not immune to the disruption of these technologies From solving the issues of poor cost time and quality that has bedevilled the industry for a long while to ensuring clients are satisfied and workers are safe digital technologies have proven to be effective in improving how the construction industry function For instance the use of building information modelling has garnered considerable attention in addressing salient design and collaboration issues among others facing the industry In the same vein the internet of things big data analytics cloud computing drones robotics sensors and a host of other technologies have been explored to improve the management and delivery of construction projects Regrettably this concept of ethics has been downplayed in the quest for the digital transformation of construction industries worldwide For the successful digitalisation of the construction industry which relies heavily on human interaction with technology the role of ethics cannot be overlooked There is an absence of a roadmap for the ethical use of digital technologies in the digitalisation of the construction industry This book which is designed to give direction for the ethical use of digital tools in the construction industry fills that gap

Economics of Property Management: The Building as a Means of Production

Herman Tempelmans Plat, Frank Heynick, 2012-06-25 The economic analysis of a building is a complex subject and traditionally it has focused on a single aspect of the structure or a single part of the construction process Dr Tempelmans Plat is a leading proponent of a new methodology which focuses on the building as a stock of services to be supplied over a long lifespan This method is more realistic since it takes into account the changes in use and the adaptation of the building over its life This book will be the first to make this method comprehensible to a wide audience of postgraduate students and professionals in the field of construction economics

Office Markets and Public Policy

Colin Jones, 2013-03-04 This is the first book that looks at how offices and office markets in cities have changed over the last 30 years It analyses the long term trends and processes within office markets and the interaction with the spatial economy

and the planning of cities It draws on examples around the world and looking forward at the future consequences of information communication technologies and the sustainability agenda it sets out the challenges that now face investors The traditional business centres of cities are losing their dominance to the brash new centres of the 1980s and 1990s as the concept of the central business district becomes more diffuse Edge cities business space and office parks have entered the vocabulary as offices have also decentralised The nature and pace of changes to office markets set within evolving spatial structures of cities has had implications for tenants and led to a demand for shorter leases The consequence is a rethink of the traditional perception of property investment as a secure long term investment and this is reflected in reduced investment holding periods by financial institutions Office Markets land management property and real estate urban planning and urban studies It will also be of interest to researchers property professionals policy makers and planning practitioners

Advanced Building Construction and Materials 2013 Milan Palko,Karin Deáková,2013-12-06 Selected peer reviewed papers from the 2013 International Conference on Advanced Building Construction and Materials ABCM 2013 September 26 27 2013 Ko ovce Slovakia **Sustainable Buildings and Infrastructure** Annie R. Pearce,Yong Han Ahn,HanmiGlobal Co, Ltd,2017-12-14 The second edition of Sustainable Buildings and Infrastructure continues to provide students with an introduction to the principles and practices of sustainability as they apply to the construction sector including both buildings and infrastructure systems As a textbook it is aimed at students taking courses in construction management and the built environment but it is also designed to be a useful reference for practitioners involved in implementing sustainability in their projects or firms Case studies best practices and highlights of cutting edge research are included throughout making the book both a core reference and a practical guide Greening Affordable Housing Abdullateef Olanrewaju,Zalina Shari,Zhonghua Gou,2019-01-30 Books on green building theories principles and strategies applicable to life cycles of all kinds of buildings and building types are already widely available However those specifically on greening affordable housing that guide various housing stakeholders at different life cycles are still very limited This book intends to fill this gap Integrating green building enables stakeholders to address the environmental component that has not traditionally been seen as an integral part of affordable housing development The book presents theories and principles with practical methods strategies and processes not only to make affordable housing green but also to support economic stability and social equity

Green Building: An Engineering Approach to Sustainable Construction Christian M. Carrico,2025-06-05 Green Building An Engineering Approach to Sustainable Construction fills a void in green building which has good textbook options for practitioners architects and sustainability experts but not an engineering focused textbook focused on green building This new text takes an engineering approach to evaluating green building techniques systems and materials The book examines the built environment from inside out looking at minimizing environmental impacts while also considering the economics and energy use and efficiency While not a test prep book it will provide the knowledge foundation that will help prepare the

students to take the Leadership in Energy and Environmental Design accreditation exam As students are often unclear on the evolving employment prospects in this field particularly for the engineer the textbook also features six case studies showing different career pathways for engineers in this arena Takes a quantitative and analytical engineering approach to evaluating green building techniques systems and materials Includes dedicated engineering examples and end of chapter problems that help develop students problem solving and analytical skills Combines conceptual and calculational aspects that link to both big picture issues e g how many Hiroshima blasts per year is the radiative forcing equivalent to along with everyday considerations like climate change real life experiences how much do I have to insulate my chicken coop to keep them warm passively in the winter Links textbook coverage to ABET criteria for accreditation of engineering programs
