The Mathematical Principles of Causal Conspiracy Book2 Michael Mark Anthony, 2025-05-16 We are self aware The Universe is aware of itself through us What are we Each year living matter processes billions of tons of chemicals in the act of living and these chemicals become a part of life for some period experiencing the very essence of being alive We are processors bags of living chemicals bags of mainly water that experience awareness and enjoy the benefits of life Is our sole purpose to make the Universe experience life When a molecule of water becomes part of our being does it also enjoy being alive It seems as if we are meant to explore the Universe to open vistas of experience that will allow a variety of inanimate matter to experience life The need to know and learn sets us apart from ordinary matter but what lurks behind this gift Is knowledge and the act of knowing just another form of a force field like the electro magnetic field and the gravitational field This Theory explains emergent intelligence through logical causality and also provides a framework for future Artificial Intelligence
