HNIC, OMS, MEE, Senior Hazardous Areas Engineer

Geoff has been working in the instrumentation, measurement and control fields for over twenty-five years and has spent the past fifteen years specialising in Hazardous Areas, Intrinsic Safety and Instrumentation Drawings. Geoff began his career at Kent Instruments as a service engineer working in both the UK and East Africa. His experience ranges from systems design functions and on-site trouble shooting, to technical and commercial customer support.

Recently Geoff has taken on the responsibility of mentoring engineers in training, in addition to the presentation of engineering workshops in the process control and measurement field. His positive interactive approach to teaching has made him popular with workshop attendees worldwide.

THE WORKSHOP

Have you ever wondered about getting a thorough introduction to the fundamentals of instrumentation, industrial automation and control; thus allowing you to work and perform simple tasks in this key area? In attending this workshop, this could be the opportunity to walk out with a great grounding in the basics of this exciting field which is rapidly changing the way all plants operate. The constant drive to cut costs means that as an operator you will increasingly have to have more skills and know-how in the plant instrumentation and process control area.

The topics covered commence on day one with an introduction to instrumentation and measurement ranging from pressure, level, temperature and flow devices followed by a review of process control including the all important topic of PID loop tuning. Day two is occupied with PLC and SCADA systems where the important topic of industrial data communication networks is also examined – again from a very simple understandable point of view. Finally, the workshop is rounded off with a hands-on review of reading and interpreting simple plant documentation such as P&IDs so that you can see and understand the operation of the plant through the documentation.

You will leave this workshop with a strong understanding of the key concepts in instrumentation, process control, SCADA and PLCs.

Pre-requisites

The workshop is presented in easy to understand practical language. All you need to benefit from this workshop is a very basic understanding of mathematics and some electrical theory. Contact us for comprehensive pre-course reading and preparation if you are unsure about your level of understanding.

*The fee for each workshop covers all materials
including workshop manual, lunches
and refreshments*
