Klein,Karen K. Lewis,1991 This paper provides a framework for evaluating how market participants beliefs about foreign exchange target zones change as they learn about central bank intervention policy In order to examine this behavior we first generalize the standard target zone model to allow for intra marginal intervention Intra marginal intervention implies that the position of market participants beliefs about the target zone can be determined from their beliefs about the likelihood of intervention As an application of this model we estimate a probability of intervention model using daily exchange rates and market observations of central bank interventions following the Louvre Accord Interestingly even over this relatively stable Louvre Accord period we find that the market s views of intervention target zones would have varied quite a bit over time Engineering Education ,1983
