The Long Game Rush Doshi, 2021-06-11 In The Long Game Rush Doshi demonstrates that China is in fact playing a long methodical game to displace America from regional and global order Drawing from a rich base of Chinese primary sources including decades worth of party documents and memoirs by party leaders he traces the history of China's grand strategy from the end of the

Cold War to the present day and puts forward an asymmetric strategy for the United States to deal with it one that ironically borrows from Beijing's own playbook

State, Capitalism, and Finance in Emerging Markets Johannes Petry, Andreas Nölke, 2025-06-24 What role do emerging markets play in the global financial system Are they subordinated within global financial hierarchies Or do they have autonomy even power to use finance to pursue state objectives In this edited volume leading scholars explore these questions focusing on state finance interactions globally The book combines literatures on international financial subordination financial statecraft and comparative capitalism to analyse state finance relationships in emerging markets particularly the BRICS Brazil Russia India China and South Africa It reveals that these states can control their domestic financial sectors despite global subordination though their ability to do so varies significantly This essential volume offers profound insights into how emerging markets are reshaping global finance for scholars and policy makers

China's Financial Opening Yu Wai Vic Li, 2018-03-13 The twenty first century has not only seen China become one of the world's largest trading nations but also its gradual integration into the global financial system Chinese sponsored

project financing schemes such as the Belt and Road Initiative and the Asian Infrastructure Investment Bank and the expanding international footprint of the renminbi have raised the specter of Beijing shaping established market rules and practices with its financial firepower. These dramatic developments beyond the Great Wall of Money have overshadowed the equally remarkable opening of China's domestic capital markets. These include initiatives that make cross border equity trade and investment easier, attempts to internationalize exclusively domestic oriented equity markets and creation of the first offshore renminbi hub in Hong Kong paving the way for the big bang of renminbi use worldwide. Li interrogates the domestic political dynamics underlying the dizzying switches between liberalization and restriction. This book argues that the interplay between the pro opening coalitions and dissenting parties has been central to the policymaking process. Financial opening has not only been driven by central bureaucratic actors but also by financial industry interests and the local authorities of financial centers acting in concert as coalitions. The local and financial constituents have shaped policy agendas and priorities and defined and framed liberalizing initiatives in ways that appealed to bureaucratic entities. They also sought wider political support by capitalizing on connections with top decision making elites. To allay opposition and maintain political and technical consensus the coalition constituents have offered concessions to dissenting parties over implementation specifics. This however has not always succeeded. Dissenting parties who recognized adverse distributional and policy risk implications inherent in the opening initiatives might decline concessionary offers leading to policy tendencies other than opening. As one of the very first political economy contributions to studies of China's financial opening from the 2000s this book will appeal to researchers of international political economy, East Asia and China specialists and financial practitioners and policymakers wanting to make sense of the country's liberalizing logic.

Finance and Development, March 2017 International Monetary Fund. External Relations Dept., 2017-03-01. This paper reports about current mainstream growth projections for the United States and the European Union over the medium term represent a marked slowdown from growth rates in the decades prior to the global financial crisis. Slower growth in Europe and the United States has mixed implications for growth prospects in developing economies. Most obviously on the negative side it means less demand for these countries exports so models of development based on export led growth may need to be rethought. In contrast for Western Europe the narrative is about catch up growth rather than the rate of cutting edge technological progress. From the middle of the 20th century to the recent global crisis this experience comprised three distinct phases. European medium term growth prospects depend both on how fast productivity grows in the United States and whether catch up growth can resume after a long hiatus. Economic historians see social capability as a key determinant of success or failure in catch up growth.

Financial Cold War James A. Fok, 2021-12-17. A groundbreaking exploration of US China relations as seen through the lens of international finance. Rising tensions between China and the United States have kept the financial markets on edge as a showdown between the world's two largest economies seems inevitable. China and the End of Global Silver, 1873-1937 Austin Dean,2020-11-15 In the late nineteenth century as much of the world adopted some variant of the gold standard China remained the most populous country still using silver Yet China had no unified national currency there was not one monetary standard but many Silver coins circulated alongside chunks of silver and every transaction became an encounter of wits China and the End of Global Silver 1873 1937 focuses on how officials policy makers bankers merchants academics and journalists in China and around the world answered a simple question how should China change its monetary system Far from a narrow technical issue Chinese monetary reform is a dramatic story full of political revolutions economic depressions chance and contingency As different governments in China attempted to create a unified monetary standard in the late nineteenth and early twentieth century the United States England and Japan tried to shape the direction of Chinese monetary reform for their own benefit Austin Dean argues convincingly that the Silver Era in world history ended owing to the interaction of imperial competition in East Asia and the state building projects of different governments in China When the Nationalist government of China went off the silver standard in 1935 it marked a key moment not just in Chinese history but in world history
