Wired to Care: How Companies Prosper When They Create Widespread Empathy

Patnaik,2009 Executives often know little about the people who buy their companies products and services This is not surprising To study people you must care about them However most companies eliminate empathy from their operations In essence they proceed as if they have calculating survival bent reptile brains Profits drive everything This is an odd disconnect because corporate livelihoods depend on people not lizards and people s brains are hardwired to be empathetic Dev Patnaik writing with Peter Mortensen shows why firms that connect empathetically with their customers do better financially He insists today s cold hearted bottom line business world has room for caring companies and he points to IBM Nike and Harley Davidson as examples The fact that empathy is also a strong business strategy is icing on the cake getAbstract suggests this fine book to CEOs marketing officers and other executives who want to build their business by acting on their respect for their customers As Patnaik explains on his blog Empathy isn t about having a visionary leader It s about making customer information an easy everyday and experiential part of working at your company **Dombey and son. Old curiosity shop.**

Hard times Charles Dickens,1868 *Engineering News and American Railway Journal* ,1899 Future Babble Daniel Gardner,2011-03-17 An award winning journalist uses landmark research to debunk the whole expert prediction industry and explores the psychology of our obsession with future history In 2008 experts predicted gas would hit 20 a gallon it peaked at 4 10 In 1967 they said the USSR would be the world s fastest growing economy by 2000 by 2000 the USSR no longer existed In 1908 it was pronounced that there would be no more wars in Europe we all know how that turned out Face it experts are about as accurate as dart throwing monkeys And yet every day we ask them to predict the future everything from the weather to the likelihood of a terrorist attack Future Babble is the first book to examine this phenomenon showing why our brains yearn for certainty about the future why we are attracted to those who predict it confidently and why it s so easy for us to ignore the trail of outrageously wrong forecasts In this fast paced example packed sometimes darkly hilarious book journalist Dan Gardner shows how seminal research by UC Berkeley professor Philip Tetlock proved that the more famous a pundit is the more likely he is to be right about as often as a stopped watch Gardner also draws on current research in cognitive psychology political science and behavioral economics to discover something quite reassuring The future is always uncertain but the end is not always near
