Human Rights and the Private Sphere Jorg Fedtke, Dawn Oliver, 2015-01-12 This book is a companion volume to Human Rights and the Private Sphere A Comparative Study Volumes 1 and 2 which analysed the effect of human rights on private relationships in a range of democratic jurisdictions around the world This book looks at a number of additional important jurisdictions in self contained chapters which describe the wider constitutional background of each system the relevant national human rights regime the influence of any international human rights instruments the judicial enforcement of human rights and the effect of human rights thinking in the private sphere This book does not just extend the geographical reach of the first two volumes but also addresses a number of specific questions which the particular experience of these new jurisdictions may help to answer These additional lines of inquiry include the influence of religion the question whether notions of human rights protection can affect private relationships even in an authoritarian public law environment whether local systems of customary law fulfil similar functions as modern constitutional guarantees and how private sphere protection develops in systems experiencing not only rapid constitutional changes but also a fundamental shift in their underlying societal paradigm This volume will be of interest to those working in the fields of human rights public law and comparative law

Transnational Legal Processes and Human Rights Asst Prof Lauren Fielder, Dr Kyriaki Topidi, 2013-03-28 It is becoming increasingly common for human rights norms to be transferred between legal and political systems and this book is a fresh approach to the intersection of transnational law and the protection of cultural difference beyond the single state border It investigates how the construction and evolution of human rights norms are transferred in

transnational legal settings and asks whether law should reflect express or control any given aspect of culture The chapters explore the ways that law and cultural identity may or may not co exist particularly in circumstances where a prima facie clash is observed Examining legal approaches to cultural differences from a comparative perspective and across a wide range of locations the book covers topics such as juvenile punishment religious defamation religious rights and conflict between industry and indigenous communities It will be of value to those working in the areas of transnational and comparative law as well as those concerned with human rights and the intersection of law and cultural difference

Human Rights in the Private Sphere Andrew Clapham,1996 **Transnational Human Rights Litigation** Andrew Novak,2019-10-02 This book analyzes the role of strategic human rights litigation in the dissemination and migration of transnational constitutional norms and provides a detailed analysis of how transnational human rights advocates and their local partners have used international and foreign law to promote abolition of the death penalty and decriminalization of homosexuality The sharing of human rights jurisprudence among judges across legal systems is currently spreading emerging norms among domestic courts and contributing to the evolution of international law While prior studies have focused on international and foreign citations in judicial decisions this global migration of constitutional norms is driven not by judges but by legal advocates themselves who cite and apply international and foreign law in their pleadings in pursuit of a specific human rights agenda Local and transnational legal advocates form partnerships and networks that transmit legal strategy and comparative doctrine taking advantage of similarities in postcolonial legal and constitutional frameworks Using examples such as the abolition of the death penalty and decriminalization of same sex relations this book traces the transnational networks of human rights lawyers and advocacy groups who engage in constitutional litigation before domestic and supranational tribunals in order to embed international human rights norms in local contexts In turn domestic human rights litigation influences the evolution of international law to reflect state practice in a mutually reinforcing process Accordingly international and foreign legal citations offer transnational human rights advocates powerful tools for legal reform

[Human Rights and the Dark Side of Globalisation](#), 2016

The Frontiers of Human Rights Nehal Bhuta, 2016

In an epoch of transnational armed conflict global environmental harm and rising inequality the extraterritorial application of human rights law has become a pressing and controversial legal issue The faultlines of the Westphalian order are the meridians along which the extraterritorial application of human rights run as human rights are invoked to address a panoply of global scale problems

from transborder environmental harm to social and economic development and global inequality to the repression of piracy in ungoverned spaces and military occupation and armed conflict in the territory of a third state

Transnational Corporations and Human Rights Olivier De Schutter, 2006-09-11 This volume offers a systematic overview of the different tools through which the human rights accountability of transnational corporations may be improved It first examines the responsibility of States in controlling transnational corporations emphasizing both the limits imposed by the protection of the rights of investors under investment treaties and the potential of the US Alien Tort Claims Act and other similar extra territorial legislations It then turns to self regulation by transnational corporations through the use of codes of conduct or international framework agreements It then discusses recent attempts at the global level to improve the human rights accountability of corporations by the direct imposition on corporations of obligations under international law Finally it considers the use of public procurement policies or of conditionalities in the lending policies of multilateral lending institutions in order to incentivize TNCs to behave ethically Altogether the book offers a rigorous legal analysis of these different developments and critically appraises their potential

Transnational Corporations and Human Rights Gwynne L. Skinner, 2020-08-20 This account of business related human rights violations details the barriers victims face when seeking remedies and offers policy solutions

Fragmentation in International Human Rights Law Marjan Ajevski, 2017-07-14 This book explores the effects of institutional fragmentation in international human rights law by comparing the rights jurisprudence of three human rights courts and bodies namely the European Court for Human Rights the Inter American Court for Human Rights and the Human Rights Committee Contributions cover the areas of freedom of expression journalism and the media right to privacy freedom of assembly and freedom of association political parties and measure the extent of fragmentation of human rights protection Moreover the volume argues that while the conflict of laws approach favoured by the International Law Commission might work in avoiding outright conflict in obligation in practice it is not an approach that presents a viable research agenda when it comes to understanding the causes and consequences of institutional fragmentation This is especially evident in areas like international human rights where the possibility of a silent drift between the jurisprudence of the three courts is a real possibility This book was originally published as a special issue of the Nordic Journal of Human Rights
