I Am A Strange Loop Douglas R Hofstadter:

I Am a Strange Loop Douglas R Hofstadter, 2007-08-01 One of our greatest philosophers and scientists of the mind asks where does the self come from and how our selves can exist in the minds of others Can thought arise out of matter Can self soul consciousness I arise out of mere matter If it cannot then how can you or I be here I Am a Strange Loop argues that the key to understanding selves and consciousness is the strange loop a special kind of abstract feedback loop inhabiting our brains The most central and complex symbol in your brain is the one called I The I is the nexus in our brain one of many symbols seeming to have free will and to have gained the paradoxical ability to push particles around rather than the reverse How can a mysterious abstraction be real or is our I merely a convenient fiction Does an I exert genuine power over the particles in our brain or is it helplessly pushed around by the laws of physics These are the mysteries tackled in I Am a Strange Loop Douglas Hofstadter's first book length journey into philosophy since G del Escher Bach Compulsively readable and endlessly thought provoking this is a moving and profound inquiry into the nature of mind [Summary of Douglas R. Hofstadter's I Am a Strange Loop](#) Everest Media, 2022-06-09T22:59:00Z Please note This is a companion version not the original book Sample Book Insights 1 The author's mother said that the photograph of her father had no meaning and that it was just a flat piece of paper with dark spots on it The author explained to her that the photograph was a soul shard of someone departed and that she should cherish it as long as she lived 2 I do not feel any sense of guilt when I slice up and eat tomatoes I do not go to bed uneasily after having consumed a fresh tomato I do not believe it is meaningful to try to imagine how the tomato felt as it was sitting on my plate being sliced apart 3 I had a summer job at age 15 punching buttons on a Friden mechanical calculator in a physiology lab at Stanford University I was asked to bring down two animals for my friend's next round of experiments I fainted right away and the next day I was told not to do that again 4 I was 21 when I read the Norwegian English writer Roald Dahl's short story Pig which changed my life and the lives of other animals as well It showed me that meat eating was a common background fact in the lives of my friends and that vegetarians were strange and sternly moralistic nutcases in my mind **Cybernetic Revelation** J.D. Casten, 2012-11-20 Cybernetic Revelation explores the dual philosophical histories of deconstruction and artificial intelligence tracing the development of concepts like the logos and the notion of modeling the mind technologically from pre history to contemporary thinkers like Slavoj i ek Steven Pinker Bernard Stiegler and Daniel C Dennett The writing is clear and accessible throughout yet the text probes deeply into major philosophers seen by JD Casten as conceptual engineers Philosophers covered include Anaximander Heraclitus Parmenides Plato Aristotle Philo Augustine Shakespeare Descartes Spinoza Leibniz Locke Berkeley Hume Kant Hegel Nietzsche Freud Jung Joyce Dewey Wittgenstein Heidegger Adorno Benjamin Derrida Chomsky i ek Pinker Dennett Hofstadter Stiegler more with special chapters on AI's history Complexity Deconstructing AI Aesthetics Consciousness more **Jeff Noon's "Vurt"** Andrew C. Wenaus, 2022-08-01 This book offers an examination of Jeff Noon's iconoclastic debut novel Vurt 1993 In this first

book length study of the novel which includes an extended interview with Noon Wenaus considers how Vurt complicates the process of literary canonization its constructivist relationship to genre its violent and oneiric setting of Manchester its use of the Orphic myth as an archetype for the practice of literary collage and musical remix and how the structural paradoxes of chaos and fractal geometry inform the novel's content form and theme Finally Wenaus makes the case for Vurt's ongoing relevance in the 21st century an era increasingly characterized by neuro totalitarianism psychopolitics and digital surveillance With Vurt Noon begins his project of rupturing feedback loops of control by breaking narrative habits and embracing the contingent and unpredictable An inventive energetic and heartbreaking novel Vurt is also an optimistic and heartfelt call for artists to actively create open futures

Diaspora, Law and Literature Klaus Stierstorfer, Daniela Carpi, 2016-11-07 The well known challenges of international migration have triggered new departures in academic approaches with diaspora studies evolving as an interdisciplinary and even transdisciplinary field of study Its emerging methodology shares concerns with another interdisciplinary field the study of the relations between law and literature which focuses on the ways in which the two cultural practices of law and literature mutually negotiate each other and on the question after the ontological commensurability of the domains This volume offers for the first time an attempt to provide an interface between these overlapping interdisciplinary endeavours of literary studies legal studies and diaspora studies In doing so it explores new approaches and invites new perspectives on diasporas migration and the disciplines that study them hopefull also adding to the cultural resources of coping with a swiftly changing social landscape in a globalizing world

Play Among Books Miro Roman, Alice_ch3n81, 2021-12-06 How does coding change the way we think about architecture This question opens up an important research perspective In this book Miro Roman and his AI Alice_ch3n81 develop a playful scenario in which they propose coding as the new literacy of information They convey knowledge in the form of a project model that links the fields of architecture and information through two interwoven narrative strands in an infinite flow of real books Focusing on the intersection of information technology and architectural formulation the authors create an evolving intellectual reflection on digital architecture and computer science

AI for Behavioural Science Stuart Mills, 2022-12-08 This book is a concise introduction to emerging concepts and ideas found at the intersection of contemporary behavioural science and artificial intelligence The book explores how these disciplines interact change and adapt to one another and what the implications of such an interaction are for practice and society AI for Behavioural Science book begins by exploring the field of machine behaviour which advocates using behavioural science to investigate artificial intelligence This perspective is built upon to develop a framework of terminology that treats humans and machines as comparable entities possessing their own motive power From here the notion of artificial intelligence systems becoming choice architects is explored through a series of reconceptualisations The architecting of choices is reconceptualised as a process of selection from a set of choice architectural designs while human behaviour is reconceptualised in terms of

probabilistic outcomes The material difference between the so called manual nudging and automatic nudging or hypernudging is then explored The book concludes with a discussion of who is responsible for autonomous choice architects
