Identity Is The New Money David Birch Cona101:

Identity Is the New Money David Birch, 2014-04-30 This book argues that personal identity is changing profoundly and that money is changing equally profoundly Cash will be replaced by a proliferation of new digital currencies **Before Babylon, Beyond Bitcoin** BIRCH, 2017-06-30 Money is changing and this book looks at where the technology of money might be taking us in the future Technology has moved our concept of money from physical things to unseen bits of information With the arrival of smart cards mobile phones and Bitcoin it has become easier than ever to create new forms of money Crucially money is also inextricably connected with our identities Your card or phone can identify you for security and also enable information about you to be associated with your money think for example of store points cards To understand all of this and to see where we might be going the author first of all looks back over the whole history of money which spans thousands of years He sees evidence for possible futures in the past both recent and ancient After all not all future starts from today For example it can be argued that the future of money began back in 1971 when money became a claim backed by reputation rather than by commodities of any kind At this point money became bits Looking much further back to a world before cash and central banks we see multiple currencies operating at the level of communities and the use of barter The newest technologies will take money back to where it came from a substitute for memory to record mutual debt obligations within multiple overlapping communities This time though money will be smart It will be money that reflects the values of the communities that produced it Future money will know where it has been who has been using it and what they have been using it for
