Love Robert C. Solomon, 2010-12-08 Love our hearts yearn for it we fall into it or out of it we'll do almost anything to attain and keep it Those who have experienced the power of love whirl from its embrace It is delicious anguish gut wrenching pain and intoxicating allure Nations go to war over it crimes are committed to satisfy its demands lives are often ruined because of it and extraordinary feats of courage and sacrifice are performed in its name But beyond the clichés and greeting card platitudes do we really understand what love is and how it alters the way we think feel and behave Should love be viewed as little more than a lusty romp or is there more to it What is the relationship between love and romance caring concern compassion thoughtfulness sex and the many other components that our society jumbles together in this potent potpourri whose power can give strength to the weakest among us or turn powerhouses of strength into emotional mush It is precisely because love is such an important part of our lives that we owe it to ourselves to reach beyond overwhelming passion and the roadblocks of illusion to achieve real understanding of this extraordinary human phenomenon It won't always be easy in fact it's sometimes quite painful But the rewards are many for those who will risk exploring their own cherished attitudes about a subject that has held us in its grip for centuries and shows no signs of letting go Some of the topics covered are *What I Feel in My Heart* *On the Alleged Origins of Romantic Love* *What Do I Want When I Want You* *Why Do I Love You* *The Importance of Being Honest* *Love Sex and Intimacy Beyond Sex and Gender* *What's So Good About Love*

MIND and LOVE: The Human Experience Lloyd Fell, 2011-01-04 The new scientific paradigm of embodied mind or situated cognition is percolating into popular mind science but its fundamentals autopoiesis and structural coupling have never been thoroughly explained Combines the paradigm shift in biology initiated by Maturana and Varela with the recent rush of ideas in social neuroscience to create what hopes to be a refreshingly new explanation of the way our mind works in our everyday experience and reveals the most common blind spots in what we thought we knew about our mind These blind spots are spoiling our individual lives and harming our prospects for peaceful coexistence and care of our environment e.g. the mistaken ideas that meaning is transferable that decisions come from conscious awareness or that knowledge is a commodity The biological significance of love and the value of embracing uncertainty and respecting the unknown point to a very hopeful vision for our future This is a scientific explanation of mind leavened with process philosophy also invoking spirituality without any religious connotation
