Course Materials Available @Trunk

General Objectives:

- This course is designed for you to think about economics from a macro perspective. The course is mostly based on the microeconomic principles of rationality and optimization, but with several deviations from them considered. We shall examine some basic aspects of an economic system such as:
 - (i) time structure: static versus dynamic
 - (ii) equilibrium structure: partial versus general
 - (iii) trade structure: real versus nominal trade
 - (iv) information structure: symmetric, differential, asymmetric information;
 - (v) risk structure: certainty equivalents, expectations and risk;
 - (vi) asset market structure: complete versus incomplete markets.
- We shall study in some detail capital accumulation, labor markets, asset pricing and the structure of asset markets, monetary policy, and fiscal policy, with attention to the relationship between individual behavior and aggregate outcomes; and macroeconomics and finance interactions.
- As a technical note, this course uses discrete time models only.

Course Requirements:

- Mid-Term Exam I: One Hour-15 Min Exam (15%) – Monday, March 3 (~ at part IV of the course)
- Mid-Term Exam II: One Hour-15 Min Exam (15%) – Wednesday, April 9 (~ at part V of the course, cumulative)
- One Two-Hour Final Exam (40%) – Friday, May 9, 8:30-10:30AM
- Short Problem Sets, Readings and Quizzes (10%)
- One Term Paper (Topics to be discussed individually) (20%) – Due on Wednesday, April 30.

[Exam and Problem Sets Policy: There are no make-up exams. Problem set is due at a prearranged date; after the deadline, the problem set loses 20% of its value for each late day; problem sets handed in six or more days after the deadline have no value. All grades in this class are curved.]

- I encourage you to work with groups of your fellow colleagues to study and solve problem sets. Group problem sets will be negotiated.

International Macroeconomic Dynamics Stephen J. Turnovsky, 1997 International Macroeconomic Dynamics provides extensive applications of important macroeconomic dynamic models to the international economy For a long time the study of macroeconomics has focused almost exclusively on a closed economy and downplayed the role of international transactions Today however researchers recognize that one cannot fully understand domestic macroeconomic relationships without considering the global economy within which each country operates Increasingly economists are treating international transactions as an integral part of the macroeconomic system and international macroeconomics has become an area of intensive research activity International Macroeconomic Dynamics provides extensive applications of important macroeconomic dynamic models to the international economy It adopts the main contemporary macroeconomic framework the representative agent model and develops a series of models of increasing complexity The author considers both small and large economies and analyzes them in both deterministic and stochastic contexts The emphasis is very much on the development of the analytical models a novel feature is the extensive use of continuous time stochastic methods While the author applies the models to a range of important policy issues particularly issues of fiscal policy the reader is invited to view the analyses as blueprints for other applications *The Macroeconomics of Corruption* Maksym Ivanyna, Alex Mourmouras, Peter Rangazas, 2021-04-20 This textbook examines corruption through a macroeconomic lens exploring the relationship between corruption fiscal policy and political economy It merges macroeconomic growth models with elements of political economic theory to address important applied topics such as income inequality within and across countries growth slowdowns and fiscal crises Revised and updated to include new research findings and recent policy discussions the second edition contains 15 new sections and 2 new chapters on topics such as public defaults the wage elasticity of work and the interest elasticity of saving and the economic and fiscal impact of the 2020 pandemic Most of the basic ideas are illustrated using a two period model of government investment that captures the future cost of policies that favor the present The more subtle and advanced issues are illustrated and in some cases quantified using the overlapping generations model of

economic growth The models used to illustrate the mechanisms of economic growth are extended to incorporate politics and the behavior of public official The text concludes with a thorough discussion of policy reforms designed to address the issues discussed in earlier chapters Intended for students familiar with intermediate level economics the second edition contains a technical appendix expanded end of chapter questions and problems and a complete solutions manual The second edition also offers updated resources for instructors including sample syllabi and over 550 multiple choice questions Offering a unified explanation for the causes and consequences of government failure fiscal crisis and needed policy reforms this text is appropriate for advanced undergraduate and beginning graduate courses in macroeconomics political economy and public policy
