Macroeconomics Of Self Fulfilling Prophecies 2nd Edition

Victor M. Corman

Macroeconomics Of Self Fulfilling Prophecies 2nd Edition:

The Macroeconomics of Self-fulfilling Prophecies Roger E. A. Farmer, 1999 Farmer argues for the future of macroeconomics as a branch of applied general equilibrium theory His main theme is that macroeconomics is best viewed as the study of equilibrium environments in which the welfare theorems break down The Macroeconomics of Self-fulfilling Prophecies Kenneth J. Matheny, Roger E. A. Farmer, 1995 **Macroeconomic Theory** Jean-Pascal Benassy, 2011-05-12 This graduate textbook is a primer in macroeconomics It starts with essential undergraduate macroeconomics and develops in a simple and rigorous manner the central topics of modern macroeconomic theory including rational expectations growth business cycles money unemployment government policy and the macroeconomics of nonclearing markets The emphasis throughout the book is on both foundations and presenting the simplest model for each topic that will deliver the relevant answers The first two chapters recall the main workhorses of undergraduate macroeconomics the Solow Swan growth model the Keynesian IS LM model and the Phillips curve The next chapters present four fundamental building blocks of modern macroeconomics rational expectations intertemporal dynamic models nonclearing markets and imperfect competition and uncertainty Later the book deals with growth notably the Ramsey model overlapping generations and endogenous growth Chapter 10 moves to the famous real business cycles RBC which integrate in a unified framework growth and fluctuations The final chapters look at the issue of stabilization how best to guard the economy from shocks and the connections between politics and the macroeconomy To make the book self contained a mathematical appendix gives a number of simple technical results that are sufficient to follow the formal developments of the book **Big Ideas in Macroeconomics** Kartik B. Athreya, 2013-12-27 An accessible description of modern macroeconomics and a defense of its policy relevance Macroeconomists have been caricatured either as credulous savants in love with the beauty of their mathematical models or as free market fundamentalists who admit no doubt as to the market's wisdom In this book Kartik Athreya draws a truer picture offering a nontechnical description of prominent ideas and models in macroeconomics and arguing for their value as interpretive tools as well as their policy relevance Athreya deliberately leaves out the technical machinery providing an essential guide to the sometimes abstract ideas that drive macroeconomists' research and practical policy advice Athreya describes the main approach to macroeconomic model construction the foundational Walrasian general equilibrium framework and its modern version the Arrow Debreu McKenzie ADM model In the heart of the book Athreya shows how the Walrasian approach shapes and unifies much of modern macroeconomics He details models central to ongoing macroeconomic analyses the neoclassical and stochastic growth models the standard incomplete markets model the overlapping generations model and the standard search model Athreya's accessible primer traces the links between the views and policy advice of modern macroeconomists and their shared theoretical approach Macroeconomic Theory and Stabilization Policy Willem H. Buiter, 1989 Brings together Buiter's major papers on macroeconomic theory and policy

The Dynamic Macroeconomic Effects of Public Capital Christophe Kamps, 2004-12-22 This book analyzes the dynamic macroeconomic effects of public capital in industrialized countries The issue of whether public capital is productive has received a great deal of recent attention Yet existing empirical analyses have been limited to a small set of countries This book presents a new database that provides internationally comparable capital stock estimates for 22 OECD countries for the 1960-2001 period Building on this database the book estimates the dynamic effects of public capital using a variety of econometric methods The results suggest that public capital is productive in OECD countries on average The theoretical analysis based on a dynamic general equilibrium model shows that the effects of public capital depend crucially on the way the government chooses to finance additional spending

A Requiem for the Fiscal Theory of the Price Level Mr. Roger Farmer, Pawel Zabczyk, 2019-10-11 The Fiscal Theory of the Price Level (FTPL) is the claim that in a popular class of theoretical models the price level is sometimes determined by fiscal policy rather than monetary policy The models where this claim has been established assume that all decisions are made by an infinitely lived representative agent We present an alternative arguably more realistic model populated by sixty-two generations of people We calibrate our model to an income profile from U.S. data and we show that the FTPL breaks down In our model the price level and the real interest rate are indeterminate even when monetary and fiscal policy are both active Our findings challenge established views about what constitutes a good combination of fiscal and monetary policies

A History of Macroeconomics from Keynes to Lucas and Beyond Michel De Vroey, 2016-01-07 This book retraces the history of macroeconomics from Keynes's General Theory to the present Central to it is the contrast between a Keynesian era and a Lucasian or dynamic stochastic general equilibrium (DSGE) era each ruled by distinct methodological standards In the Keynesian era the book studies the following theories: Keynesian macroeconomics, monetarism, disequilibrium macroeconomics, Patinkin-Leijonhufvud and Clower non-Walrasian equilibrium models, and first-generation new Keynesian models Three stages are identified in the DSGE era: new classical macroeconomics, Lucas RBC modelling, and second-generation new Keynesian modeling The book also examines a few selected works aimed at presenting alternatives to Lucasian macroeconomics While not eschewing analytical content, Michel De Vroey focuses on substantive assessments and the models studied are presented in a pedagogical and vivid yet critical way

History, Methodology and Identity for a 21st Century Social Economics Wilfred Dolfsma, D. Wade Hands, Robert McMaster, 2019-05-28 This book seeks to advance social economic analysis economic methodology and the history of economic thought in the context of twenty first century scholarship and socio economic concerns Bringing together carefully selected chapters by leading scholars it examines the central contributions that John Davis has made to various areas of scholarship In recent decades

criticisms of mainstream economics have rekindled interest in a number of areas of scholarly inquiry that were frequently ignored by mainstream economic theory and practice during the second half of the twentieth century including social economics economic methodology and history of economic thought This book contributes to a growing literature on the revival of these areas of scholarship and highlights the pivotal role that John Davis s work has played in the ongoing revival Together the international panel of contributors show how Davis s insights in complexity theory identity and stratification are key to understanding a reconfigured economic methodology They also reveal that Davis s willingness to draw from multiple academic disciplines gives us a platform for interrogating mainstream economics and provides the basis for a humane yet scientific alternative This unique volume will be essential reading for advanced students and researchers across social economics history of economic thought economic methodology political economy and philosophy of social science *The Writers Directory* ,2013 Knowledge, Information, and Expectations in Modern Macroeconomics Philippe Aghion,Roman Frydman,Joseph E. Stiglitz,Michael Woodford,2021-01-12 Macroeconomics would not be what it is today without Edmund Phelps This book assembles the field s leading figures to highlight the continuing influence of his ideas from the past four decades Addressing the most important current debates in macroeconomic theory it focuses on the rates at which new technologies arise and information about markets is dispersed information imperfections and the heterogeneity of beliefs as determinants of an economy s performance The contributions which represent a breadth of contemporary theoretical approaches cover topics including the real effects of monetary disturbances difficulties in expectations formation structural factors in unemployment and sources of technical progress Based on an October 2001 conference honoring Phelps this incomparable volume provides the most comprehensive and authoritative account in years of the present state of macroeconomics while also pointing to its future The fifteen chapters are by the editors and by Daron Acemoglu Jess Benhabib Guillermo A Calvo Oya Celasun Michael D Goldberg Bruce Greenwald James J Heckman Bart Hobijn Peter Howitt Hehui Jin Charles I Jones Michael Kumhof Mordecai Kurz David Laibson Lars Ljungqvist N Gregory Mankiw Dale T Mortensen Maurizio Motolese Stephen Nickell Luca Nunziata Wolfgang Ochel Christopher A Pissarides Glenda Quintini Ricardo Reis Andrea Repetto Thomas J Sargent Jeremy Tobacman and Gianluca Violante Commenting are Olivier J Blanchard Jean Paul Fitoussi Mark Gertler Robert E Hall Robert E Lucas Jr David H Papell Robert A Pollak Robert M Solow Nancy L Stokey and Lars E O Svensson Also included are reflections by Phelps a preface by Paul A Samuelson and the editors introduction **Methodological Foundations of Macroeconomics** Alessandro Vercelli,1991-09-26 This book is an investigation of the methodological and epistemological foundations of macroeconomic theory based on an examination of the theories of Keynes and Lucas It is divided into two parts In the first Professor Vercelli discusses the methodological issues which lie behind the conflict among different schools of thought in macroeconomics equilibrium and disequilibrium risk and uncertainty rationality and causality These issues are central to the current debate not only in many branches of economics

but also in other scientific disciplines The traditional point of view of science based on equilibrium stability and determinism has been increasingly challenged by a new point of view in which disequilibrium instability and uncertainty play a crucial role This the author argues is bound to put macroeconomics in a new more promising position In the second part of the book the author compares the two main alternative research programmes in macroeconomics that outlined by Keynes in his General Theory and that suggested by Lucas the leader of the new classical economists

Complex Economic Dynamics: An introduction to macroeconomic dynamics Richard Hollis Day, 1994 The two volumes of Complex Economic Dynamics show that far from being a passing trend in economic research complex dynamics belongs at the heart of the subject Although they can be read independently the volumes follow a logical sequence Volume 1 contained nontechnical introductions to the basics of economic change and to the mathematical and theoretical tools used to describe them Volume 2 which is concerned with macroeconomic dynamics looks at the economy as a whole Topics include business cycles economic growth economic development and dynamical economic science and policy The book concludes with the author's reflections on the implications of complex dynamics for economic theory quantitative research and government policy Pub desc

Learning and Expectations in Macroeconomics George W. Evans, Seppo Honkapohja, 2012-01-06 A crucial challenge for economists is figuring out how people interpret the world and form expectations that will likely influence their economic activity Inflation asset prices exchange rates investment and consumption are just some of the economic variables that are largely explained by expectations Here George Evans and Seppo Honkapohja bring new explanatory power to a variety of expectation formation models by focusing on the learning factor Whereas the rational expectations paradigm offers the prevailing method to determining expectations it assumes very theoretical knowledge on the part of economic actors Evans and Honkapohja contribute to a growing body of research positing that households and firms learn by making forecasts using observed data updating their forecast rules over time in response to errors This book is the first systematic development of the new statistical learning approach Depending on the particular economic structure the economy may converge to a standard rational expectations or a rational bubble solution or exhibit persistent learning dynamics The learning approach also provides tools to assess the importance of new models with expectational indeterminacy in which expectations are an independent cause of macroeconomic fluctuations Moreover learning dynamics provide a theory for the evolution of expectations and selection between alternative equilibria with implications for business cycles asset price volatility and policy This book provides an authoritative treatment of this emerging field developing the analytical techniques in detail and using them to synthesize and extend existing research
