Transcritical CO2 Heat Pump Xin-rong Zhang,Hiroshi Yamaguchi,2021-02-17 A timely and comprehensive introduction to CO2 heat pump theory and usage A comprehensive introduction of CO2 application in heat pump authored by leading scientists in the field CO2 is a hot topic due to concerns over global warming and the greenhouse effect Its disposal and application has attracted considerable research and governmental interest Explores the basic theories devices systems and cycles and real application designs for varying applications ensuring comprehensive coverage of a current topic CO2 heat transfer has everyday applications including water heaters air conditioning systems residential and commercial heating systems and cooling systems

Advances in Heat Pump-Assisted Drying Technology Vasile Minea,2016-09-15 Drying of solids is one of the most common complex and energy intensive industrial processes Conventional dryers offer limited opportunities to increase energy efficiency Heat pump dryers are more energy and cost effective as they can recycle drying thermal energy and reduce CO2 particulate and VOC emissions due to drying This book provides an introduction to the technology and current best practices and aims to increase the successful industrial implementation of heat pump assisted dryers It enables the reader to engage confidently with the technology and provides a wealth of information on theories current practices and future directions of the technology It emphasizes several new design concepts and operating and control strategies which can be applied to improve the economic and environmental efficiency of the drying process It answers questions about risks advantages vs disadvantages and impediments and offers solutions to current problems Discusses heat pump technology in general and its present and future challenges Describes interesting and promising innovations in drying food agricultural and wood products with various heat pump technologies Treats several technical aspects from modeling and simulation of drying processes to industrial applications Emphasizes new design concepts and operating and control strategies to improve the efficiency of the drying process

Domestic Microgeneration Iain Staffell,Daniel J.L. Brett,Nigel P. Brandon,Adam D. Hawkes,2015-06-19 Microgeneration producing energy for the home in the home is a substantial improvement over the current centralised and detached energy model employed the world over Domestic Microgeneration is the first in depth reference work for this exciting and emerging field of energy generation It provides detailed reviews of ten state of the art technologies including solar PV and thermal micro CHP and heat pumps and considers them within the wider context of the home in which they are installed and the way that they are operated Alongside the many successes this book highlights the common pitfalls that beset the industry It offers best practice guidance on how they can be avoided by considering the complex linkages between technology user installer and government This interdisciplinary work draws together the social economic political and environmental aspects of this very diverse energy genre into a single must have reference for academics and students of sustainability and energy related subjects industry professionals policy makers and the growing number of energy literate householders who are looking for ways to

minimise their environmental footprint and their energy bills with microgeneration

Energy Science John Andrews, John G. Andrews, Nicholas Alfred Jelley, Nick Jelley, 2022 Can climate change be tackled with the current energy technologies and policies available Are renewable energy sources now economically competitive with fossil fuels How much power can be provided by all the various forms of low carbon energy Energy Science introduces the latest energy technologies explains the physical principles underlying each technology and discusses their environmental economic and social impacts Covering fossil fuels renewables and nuclear energy this book provides you with tools to evaluate the key sources of energy available and introduces potential solutions to the energy problems facing us today New to this edition Greater emphasis on the challenges and urgent actions required in the transition from fossil fuels to low carbon sources of energy explanations of recent developments in solar PV off shore wind deploying renewables and battery technology More international case studies looking at real world energy issues and applications of energy technology Increased focus on making the text engaging for a wide range of students with flexible treatment of the more mathematical content Book jacket

Greener Homes for the Future? Great Britain. Parliament. House of Commons. Environmental Audit Committee, 2008 This report examines three overarching issues the impact of the growth of house building targets what sort of homes should be built and where these homes should be built The Committee on Climate Change should assess the impact of the Government's new house building targets for three million new homes by 2020 on the UK's 2020 carbon reduction target In light of the latest economic projections fundamental changes in the mortgage market and falling house prices the Government should review the assumptions on which its target is based And the target for 2 million new homes to be built before the zero carbon target comes into effect in 2016 with a further 1 million to be built afterwards should change to increase significantly the proportion built afterwards Zero carbon homes must source their heat and power from renewable sources Ideally these will come from on site renewable power generation where this is impractical off site renewables should be built or funded The Government should ensure that an excess of land is not made available to developers something which is already leading to greenfield sites being developed in preference to brownfield sites The Government should urgently reintroduce a clear sequential test in favour of brownfield development into planning policy Greater emphasis ought to be placed on energy efficiency and sustainability within the building control regime that inspects new housing The Government should consider introducing higher penalties for developers who fail to meet energy efficiency standards The same environmental tests used for eco towns should be applied to all major housing developments from 2016 The Government should re-examine eco town proposals to ensure they have good public transport links and are located close to commercial centres and employment opportunities

Energy Efficiency and Fuel Poverty Great Britain. Parliament. House of Commons. Environment, Food and Rural Affairs Committee, 2008 The Committee decided to examine the UK Energy Efficiency Action Plan with particular reference to Defra's efforts to improve households energy efficiency and its statutory duty under the Warm Homes and

Energy Conservation Act 2008 to ensure that people in England do not live in fuel poverty after November 2016 The Committee had received many responses to its call for evidence but on 3 October 2008 the Prime Minister announced the creation of a new Government department the Department of Energy and Climate Change The responsibility for fuel poverty was passed from Defra to the new Department The Committee decided not to proceed with its inquiry but has decided to publish the written evidence it received on this subject The Committee recommends that the new select committee set up to examine the expenditure policy and administration of the new Department of Energy and Climate Change seriously consider holding an inquiry into fuel poverty at the earliest opportunity

Heat Pumps Walter Grassi, 2017-08-11 The text describes the main features of currently available heat pumps focusing on system operation and interactions with external heat sources In fact before choosing a heat pump several aspects must be assessed in detail the actual climate of the installation site the building's energy requirements the heating system the type of operation etc After discussing the general working principles the book describes the main components of compression machines for EHPs GHPs and CO₂ heat pumps It then addresses absorption heat pumps and provides additional details on the behavior of two fluid mixtures The book presents a performance comparison for the different types helping designers choose the right one for their needs and discusses the main refrigerants Notes on helpful additional literature websites and videos also concerning relevant European regulations round out the coverage This book will be of interest to all engineers and technicians whose work involves heat pumps It will also benefit students in energy engineering degree programs who want to deepen their understanding of heat pumps

The Impact of Automatic Control Research on Industrial Innovation Silvia Mastellone, Alex van Delft, 2023-12-08 The Impact of Automatic Control Research on Industrial Innovation Bring together the theory and practice of control research with this innovative overview Automatic control research focuses on subjects pertaining to the theory and practice of automation science and technology subjects such as industrial automation robotics and human machine interaction With each passing year these subjects become more relevant to researchers policymakers industrialists and workers alike The work of academic control researchers however is often distant from the perspectives of industry practitioners creating the potential for insights to be lost on both sides The Impact of Automatic Control Research on Industrial Innovation seeks to close this distance providing an industrial perspective on the future of control research It seeks to outline the possible and ongoing impacts of automatic control technologies across a range of industries enabling readers to understand the connection between theory and practice The result is a book that combines scholarly and practical understandings of industrial innovations and their possible role in building a sustainable world The Impact of Automatic Control Research on Industrial Innovation readers will also find Insights on industrial and commercial applications of automatic control theory Detailed discussion of industrial sectors including power automotive production processes and more An applied research roadmap for each sector This book is a must own for both control researchers and control engineers in both theoretical and

applied contexts as well as for graduate or continuing education courses on control theory and practice Editorial board Silvia Mastellone University of Applied Science Northwestern Switzerland Alex van Delft vanDelft it DSM Tariq Samad University of Minnesota Iven Mareels Federation University Australia IBM Scott Bortoff Mitsubishi Electric Research Labs Stefano Di Cairano Mitsubishi Electric Research Labs Alisa Rupenyan ETHZ
