Modern Sample Preparation for Chromatography Serban C. Moldoveanu, Victor David, 2021-02-24 Modern Sample Preparation for Chromatography Second Edition explains the principles of sample preparation for chromatographic analysis. A variety of procedures are applied to make real world samples amenable for chromatographic analysis and to improve results. This book's authors discuss each procedure's advantages, disadvantages, and their applicability to different types of samples along with their fit for different types of chromatographic analysis. The book contains numerous literature references and examples of sample preparation for different matrices and new sections on green approaches in sample preparation, progress in automation of sample preparation, non-conventional solvents for LLE, ionic liquids, deep eutectic mixtures, and others, and more. Presents numerous techniques applied for sample preparation for chromatographic analysis. Provides an up-to-date source of information regarding the progress made in sample preparation for chromatography. Describes examples for specific types of matrices providing a guide for choosing the appropriate sample preparation method for a given analysis.

Selection of the HPLC Method in Chemical Analysis Serban C. Moldoveanu, Victor David, 2016-11-01 Selection of the HPLC Method in Chemical Analysis serves as a practical guide to users of high performance liquid chromatography and provides criteria for method selection, development, and validation. High performance liquid chromatography (HPLC) is the most common analytical technique currently practiced in chemistry. However, the process of finding the appropriate information for a particular analytical project requires significant effort and pre-existent knowledge in the field. Further sorting through the wealth of published data and literature takes both time and effort away from the critical aspects of HPLC method selection. For the first time, a systematic approach for sorting through the available information and reviewing critically the up-to-date progress in HPLC for selecting a specific analysis is available in a single book. Selection of the HPLC Method in Chemical Analysis is an inclusive go-to reference for HPLC method selection, development, and validation. Addresses the various aspects of practice and instrumentation needed to obtain reliable HPLC analysis results. Leads researchers to the best choice of an HPLC method from the overabundance of information existent in the field. Provides criteria for HPLC method selection, development, and validation. Authored by world-renowned HPLC experts who have more than 60 years of combined experience in the field.
