The Separatist Conflict in Sri Lanka Asoka Bandarage,2008-11-19 The book provides a detailed historically based analysis of the origin evolution and potential resolution of the civil conflict in Sri Lanka over the struggle to establish a separate state in its Northern and Eastern provinces This conflict between the Sri Lankan government and the secessionist LTTE Liberation Tigers of Tamil Eelam is one of the world s most intractable contemporary armed struggles The internationally banned LTTE is considered the prototype of modern terrorism It is known to have introduced suicide bombing to the world and recently became the first terrorist organization ever to acquire an air force The iron law of ethnicity the assumption that cultural difference inevitably leads to conflict has been reinforced by the 9 11 attacks and conflicts like the one in Sri Lanka However the connections among ethnic difference conflict and terrorism are not automatic This book broadens the discourse on the separatist conflict in Sri Lanka by moving beyond the familiar bipolar Sinhala versus Tamil ethnic antagonism to show how the form and content of ethnicity are shaped by historical social forces It develops a multipolar analysis which takes into account diverse ethnic groups intra ethnic social class caste and other variables at the local regional and international levels Overall this book presents a conceptual framework useful for comparative global conflict analysis and resolution shedding light on a host of complex issues such as terrorism civil society

Keethaponcalan, 2022-07-21 This volume examines and analyses electoral politics in Sri Lanka through the theoretical framework of manipulation The following questions guided the study how do political actors manipulate elections and what are the salient features of electoral politics in Sri Lanka Primary and secondary data formed the basis of the analysis examining eight presidential elections The research findings indicated that Sri Lankan governments political parties and political leaders have taken advantage of six types of electoral manipulation including constitutional tinkering field fixing time fixing vote suppression process manipulation and resource manipulation Through a close examination of eight presidential elections research carried out for the volume found that elections are often associated with violence presidential elections are mainly a majoritarian affair in which minority communities play only a marginal role there is a significant gender imbalance as women's participation in the electoral process is very limited despite the presence of a large number of candidates contesting the election it always remains a two way race and amid extensive manipulation and other problems voter participation tends to be high This volume will be a valuable resource for students academics and researchers who focus on democracy good governance electoral studies and South Asian politics and history and will enhance the conceptual foundation of democracy advocates and activists Sovereignty, Space and Civil War in Sri Lanka Anoma Pieris, 2018-10-25 Analyses of the Sri Lankan civil war 1983 2009 overwhelmingly represent it as an ethnonationalist contest prolonging

postcolonial arguments on the creation and dissolution of the incipient nation state since independence in 1948 While colonial divide and rule policies the rise of ethnonationalist lobbies structural discrimination and majoritarian democracy have been established as grounds for inter ethnic hostility there are other significant transformative forces that remain largely unacknowledged in postcolonial analyses This ambitious multiscalar spatial study of civil war in Sri Lanka offers an intersectional de ethnicised analysis of political sovereignty drawn out by the struggle for territory Based on vital retrospective findings from the five year postwar period when wartime hostilities were still festering it convincingly links ethnonationalism to postnational border politics marketisation militarised securitisation and illiberal democracy This book argues that internecine conflict exposes the implicit violence within nation state formations mass human displacements heighten collective and individual ontological insecurity and neoliberalism makes the nation porous in unforeseen ways Based around three themes normative spaces human mobilities and exilic states it is organised into ten comprehensive chapter based explorations of a range of spatial units including homes cities routes camps and experiences of ruin that were irrevocably politicised by protracted conflict Focusing on their material transformations over a thirty seven year period the book explores what can be known of the war if we look beyond ethnicity to other salient shared geographical features of this embattled history The book uncovers how fealty to exclusionary cultures of political sovereignty aligns us with their violence limiting our capacity for empathy a boundary seemingly exacerbated by neoliberal opportunities Making use of Sri Lanka as a case study to test geographic architectural and urban methodologies for understanding violence this book acts as a provocation to rethink current readings of the particular case study while reflecting on the more general impact of marketisation and militarisation in Asia It will be of interest to an interdisciplinary audience including those scholars interested in South Asian history politics and civil war South Asian studies border studies geography and architecture and urban studies
