Kershaw,2019-06-15 When considering how well modern cars perform in many areas it is easy to forget some of the issues motorists had on a regular basis 40 years ago Cars needed maintenance regularly plugs and points had to be replaced on a frequent basis the expected engine life was 100 000 miles rather than double and triple the expectation that you see today and an everyday hassle especially in warm climates was being the victim of an overheating car It was not uncommon on a hot day to see cars stuck in traffic spewing coolant onto the ground with the hoods up in a desperate attempt to cool off Fast forward to today and it s easy to forget that modern cars even have coolant The temp needle moves to where it is supposed to be and never moves again until you shut the car off For drivers of vintage cars this level of reliability is also attainable In
