Competition in Socialist Society Katalin Miklóssy, Melanie Ilic, 2014-07-25 This book explores how the concept of competition which is usually associated with market economies operated under state socialism in the Soviet Union and Eastern Europe where the socialist system based on command economic planning and state centred control over society was supposed to emphasise co operation rather than competitive mechanisms The book considers competition in a wider range of industries and social fields across the Soviet bloc and shows how the gradual adoption and adaptation of Western practices led to the emergence of more open competitiveness in socialist society The book includes discussion of the state s view of competition and focuses especially on how competition operated at the grassroots level It covers politico economic reforms and their impact both overall and at the enterprise level competition in the cultural sphere and the huge effect of increasing competition on socialist ways of thinking

The Traces of Jacques Derrida's Cinema Timothy Holland, 2024 Situated at the intersection of film and media studies literary theory and continental philosophy The Traces of Jacques Derrida s Cinema provides a trenchant account of the role of cinema in the oeuvre of one of the most influential philosophers of the twentieth century Jacques Derrida 1930 2004 The book is animated by Derrida s self confessed passion for the movies his reluctance to write about film despite the range of his corpus and the generative encounters arising between his legacy and the field of film and media studies as a result Given the expanse of its references interdisciplinarity and consideration of Derrida s approach to the experience of both spectatorship and the act of being filmed The Traces of Jacques Derrida s Cinema contributes to the ongoing close analyses of the philosopher s work while also providing a rigorous introduction to deconstruction Author Timothy Holland interweaves historical and speculative modes of research and writing to articulate the peripheral yet surprisingly crucial place of the cinematic medium for Derrida and his philosophical enterprise The outcome is a meticulously detailed survey of the centers and margins of Derrida s oeuvre that include forays into such terrain as his notable appearances in films an unrealized project on cinema and belief that Derrida proposed in a 2001 interview the correspondences between the strategies of deconstruction and the traditions homecomings and wordplay of David Lynch s cinematic media and the questions wedded to the future of film studies amid the vicissitudes of the modern virtual university Ultimately Holland pursues the thinking activated by the flickering of Derrida s cinema not only the absence and presence of film in Derrida s professional and personal life but also the rigor of academic discourse and the pleasures of the movies ghosts and technology religious faith and scientific knowledge and ruination and survival as a critical chance for reflection
