Lighting Retrofit and Relighting James R. Benya, Donna J. Leban, 2011-03-08 The ultimate guide to the retrofitting of lighting for greater efficiency and performance Retrofitting outdated energy guzzling lighting components with green energy saving alternatives is a process that promotes sustainability and offers significant benefits for businesses contractors and the community at large Not only can retrofitting improve the overall quality and functionality of light it also can make spaces safer easier and less costly to maintain and more comfortable to inhabit From lighting technology to retrofit financial analysis Lighting Retrofit and Relighting evaluates the latest lighting system types then demonstrates how to apply them for the greatest functional and cost saving benefit This book Discusses the recent advances in lighting equipment and retrofittable controls for both interior and outdoor use Explains how to do a lighting audit to identify and evaluate logical retrofit choices Includes case studies of retrofits illustrating improvements in the quality and efficacy of new lighting Demonstrates how cost savings realized over time can not only pay for new equipment but produce a return on the investment Lighting Retrofit and Relighting serves as an ideal reference for students or professionals whether they are energy auditors designers installers facilities managers or manufacturers by taking a close look at the most current lighting technology illuminating pathways toward a brighter future

Encyclopedia of Color Science and Technology Renzo Shamey, 2023-09-29 This fully revised and expanded 2nd edition provides a single authoritative resource describing the concepts of color and the application of color science across research and industry Significant changes for the 2nd edition include New and expanded sections on color engineering More entries on fundamental concepts of color science and color terms Many additional entries on specific materials Further material on optical concepts and human visual perception Additional articles on organisations tools and systems relevant to color A new set of entries on 3D presentation of color In addition many of the existing entries have been revised and updated to ensure that the content of the encyclopedia is current and represents the state of the art The work covers the full gamut of color the fundamentals of color science the physics and chemistry color as it relates to optical phenomena and the human visual system and colorants and materials The measurement of color is described through entries on colorimetry color spaces color difference metrics color appearance models color order systems and cognitive color The encyclopedia also has extensive coverage of applications throughout industry including color imaging color capture display and printing and descriptions of color encodings color management processing color and applications relating to color synthesis for computer graphics are included The broad scope of the work is illustrated through entries on color in art conservation color and architecture color and education color and culture and biographies of some of the key figures involved in color research throughout history With over 250 entries from color science researchers across academia and industry this expanded 2nd edition of the Encyclopedia of Color Science and Technology remains the most important single resource in color science

Evaluation of Human Work John R. Wilson, Sarah Sharples, 2015-04-16 Written by experts with real world

experience in applying ergonomics methodology in a range of contexts Evaluation of Human Work Fourth Edition explores ergonomics and human factors from a doing it perspective More than a cookbook of ergonomics methods the book encourages students to think about which methods they should apply when and why
