Staff, 2013 IFSTA and FPP often publish materials to help firefighters meet certification requirements but we also acknowledge that training doesn't end with certification. *Introduction to Fire Origin and Cause* 4th Edition is a manual designed to train fire fighters beyond the certification level and make them better qualified. The manual addresses key sections of NFPA 1001 2013 edition and NFPA 1021 2009 edition that focus on a fire service responder's responsibility to begin the process of fire investigation. This includes determining where a fire began and how it started. The manual is intended for firefighters and company officers who may be called upon to protect evidence that may be of value to an investigation or begin the investigation of the fire themselves. The manual packs a lot of valuable information into seven chapters including fire behavior, scene security, scene safety during investigation, protection and collection of evidence, fire pattern identification and analysis, and origin and cause determination. **Essentials of Fire Fighting** International Fire Service Training Association, 2013. The Skill Sheet Handbook is a sturdy wire bound handbook of all 192 firefighter skills found in the *Essentials of Fire Fighting and Fire Department Operations* and the Skill Evaluation Checklists found in the curriculum. These skill sheets provide more detail and are more heavily illustrated than those at the end of each chapter. The Skill Sheet Handbook is designed to be used outdoors in the demanding firefighter training environment withstanding water and repeated use. It lays flat for easy reference while students practice skills. This rugged tool is intended to serve as a quick reference for students as well as a valuable instructor resource when preparing students for the skill portion of end of course and firefighter certification exams.
