Optimization and Industry: New Frontiers Panos M. Pardalos, Victor Korotkiikh, 2013-12-01 Optimization from Human Genes to Cutting Edge Technologies The challenges faced by industry today are so complex that they can only be solved through the help and participation of optimization experts For example many industries in e commerce finance medicine and engineering face several computational challenges due to the massive data sets that arise in their applications Some of the challenges include extended memory algorithms and data structures new programming environments software systems cryptographic protocols storage devices data compression mathematical and statistical methods for knowledge mining and information visualization With advances in computer and information systems technologies and many interdisciplinary efforts many of the data avalanche challenges are beginning to be addressed Optimization is the most crucial component in these efforts Nowadays the main task of optimization is to investigate the cutting edge frontiers of these technologies and systems and find the best solutions for their realization Optimization principles are evident in nature the perfect optimizer and appeared early in human history Did you ever watch how a spider catches a fly or a mosquito Usually a spider hides at the edge of its net When a fly or a mosquito hits the net the spider will pick up each line in the net to choose the tense line Some biologists explain that the line gives the shortest path from the spider to its prey *The Race for Space* ,1999

Asian Oil & Gas ,1994 **Liquefied Petroleum Gas (LPG) Cylinder Testing** Ramakrishna Akula, Nihal Siddiqui, Sojan Lal Poullose, 2014-07-02 Safety of LPG cylinder is a major concern in developing countries like India This book is focused on identifying certain key areas for improvement in standards where they can be interpreted erroneously Although the work is based on Indian Standards the concept can be extended to any other steel cylinder standards across the globe viz DOT EN ISO BS CSA AS etc Detailed solution was discussed in this book for the identified gaps in standards with scientific methodology By implementing this plan all cylinders produced in a manufacturing location can be verified and ensured that they are complied to national standards on material compliance Further all stakeholders viz Consumers Marketing oil companies accident incident investigators statutory bodies certifying agencies of LPG Cylinder business can be benefited by implementing this plan The method can also be extended to improve safety of cylinder in market by ensuring its material properties during its life cycle This is currently a major gap in existing national or international standards mentioned above on steel Cylinder specifications
