A Cascaded Multi-level H-bridge Inverter Utilizing Capacitor Voltages Sources Frances A. Hardrick,2002

Comparative Study of Power Semiconductor Devices in a Multilevel Cascaded H-bridge Inverter Kenneth Mordi,2018

This thesis compares the performance of a nine level transformerless cascaded H bridge CHB inverter with integrated battery energy storage system BESS using SiC power MOSFETs and Si IGBTs Two crucial performance drivers for inverter applications are power loss and efficiency Both of these are investigated in this thesis Power devices with similar voltage and current ratings are used in the same inverter topology and the performance of each device is analyzed with respect to switching frequency and operating temperature The loss measurements and characteristics within the inverter are discussed The Saber simulation software was used for the comparisons The power MOSFET and IGBT modeling tools in Saber were extensively utilized to create the models of the power devices used in the simulations The inverter system is also analyzed using Saber Simulink cosimulation method to feed control signals from Simulink into Saber The results in this investigation show better performances using a SiC MOSFET based grid connected BESS inverter with a better return of investment
