

H. REVIEW OF TAX RESEARCH MATERIALS

1. Introduction

This topic will describe the various types of authoritative documents used in researching tax issues and discuss various secondary sources that can be used to identify and locate these documents.

The first steps in the tax research process are to analyze the available facts, pin-point the legal issues involved, and formulate an appropriate tax question (or questions) to be researched. Preliminary research may indicate the need for additional facts or reformulation of the original questions. In an examination of unrelated trade or business income, for example, an initial inquiry may focus on the relatedness of a particular activity to the exempt purposes of the organization. The issue, however, may ultimately be resolved with reference to one of the exceptions to the term "trade or business" provided in IRC 513(a).

Once the research question has been formulated, the search for relevant authority can begin.

2. Sources of Tax Law Authority

There are three basic types of authoritative documents: statutory, administrative and judicial.

A. Statutory Authority

(1) The Internal Revenue Code

The Internal Revenue Code is the statutory foundation of all federal tax authority, except for occasional uncodified provisions and certain international issues covered in tax treaties with foreign countries. Prior to 1939, each individual revenue act passed by Congress amounted to a complete reenactment of the entire tax law. In 1939, however, all federal tax law was consolidated into Title 26 of the United States Code as the Internal Revenue Code of 1939, and subsequent revenue acts were used to amend the 1939 Code. By 1954, the growth of federal taxation led Congress to completely revise the 1939 Code. The Internal Revenue Code of 1954 was that revision. Despite frequent amendments, the designation "1954"

Foundations for growth and security United States. President's Materials Policy Commission,1952 **VAT Neutrality**

Charlène Adline Herbain,2015-05-04 Most major economies use a value added tax VAT which is a derivation of the French 1954 taxe sur la valeur ajout e The initial imposition of VAT in France and its spread around the world have been driven by economic reasons This book focuses on one of these economic triggers the neutrality of VAT as regards the functioning of the economy It demonstrates that the reason VAT was chosen in France and why thereafter it spread around the world was because it offered the possibility to collect governmental revenue while allowing the economic forces of the market to

interplay without being adversely affected The prerequisite conditions for the existence of VAT neutrality are therefore identified herein along with an overview of the VAT mechanism demonstrating that the concept of neutrality is built into the VAT system in a manner that allows for the preservation of the natural functioning of the market After the definition of VAT neutrality is set forth the elements that comprise VAT neutrality are tested against the realities on the ground and the issues that infringe the neutrality of VAT are identified and analysed In conclusion remedies for these issues are being sought by a review of the causes of infringement of VAT neutrality in the perspective of selected proposals for modified VAT systems These proposals include redesignating the place where VAT is levied and improving VAT collection Ultimately the proposed solution has recourse to the roots of VAT together with the most advanced technological tools available to give back to VAT the power to levy revenue while letting the economic forces of the market interplay without instigating any adverse influence
