Archaeological Theory in Practice Patricia Urban, Edward Schortman, 2019-03-04 Many students view archaeological theory as a subject distinct from field research This division is reinforced by the way theory is taught often in stand alone courses that focus more on logic and reasoning than on the application of ideas to fieldwork Divorcing thought from action does not convey how archaeologists go about understanding the past This book bridges the gap between theory and practice by looking in detail at how the authors and their colleagues used theory to interpret what they found while conducting research in northwest Honduras This is not a linear narrative Rather the book highlights the open ended nature

of archaeological investigations in which theories guide research whose findings may challenge these initial interpretations and lead in unexpected directions Pursuing those novel investigations requires new theories that are themselves subject to refutation by newly gathered data The central case study is the writers work in Honduras The interrelations of fieldwork data theory and interpretation are also illustrated with two long running archaeological debates the emergence of inequality in southern Mesopotamia and inferring the ancient meanings of Stonehenge The book is of special interest to undergraduate Anthropology Archaeology majors and first and second year graduate students along with anyone interested in how archaeologists convert the static materials we find into dynamic histories of long vanished people Archaeological Theory in Practice Patricia Ann Urban,Edward M. Schortman,2017 **Historical Archaeology** Robert L Schuyler,2019-07-18 A sourcebook devoted to historical archaeology a significant field of study which blends together the theories and methods of anthropology history and archaeology **The Oxford Handbook of the Archaeology of Ritual and Religion** Timothy Insoll,2011-10-28 The Oxford Handbook of the Archaeology of Ritual and Religion provides a comprehensive overview by period and region of the relevant archaeological material in relation to theory methodology definition and practice Although as the title indicates the focus is upon archaeological investigations of ritual and religion by necessity ideas and evidence from other disciplines are also included among them anthropology ethnography religious studies and history The Handbook covers a global span Africa Asia Australasia Europe and the Americas and reaches from the earliest prehistory the Lower and Middle Palaeolithic to modern times In addition chapters focus upon relevant themes ranging from landscape to death from taboo to water from gender to rites of passage from ritual to fasting and feasting Written by over sixty specialists renowned in their respective fields the Handbook presents the very best in current scholarship and will serve both as a comprehensive introduction to its subject and as a stimulus to further research
