Predictive Analytics Eric Siegel, 2013-02-19 In this rich entertaining primer former Columbia University professor and Predictive Analytics World founder Eric Siegel reveals the power and perils of prediction What type of mortgage risk Chase Bank predicted before the recession Predicting which people will drop out of school cancel a subscription or get divorced before they are even aware of it themselves Why early retirement decreases life expectancy and vegetarians miss fewer flights Five reasons why organizations predict death including one health insurance company A truly omnipresent science predictive analytics affects everyone every day Although largely unseen it drives millions of decisions determining whom to call mail investigate incarcerate set up on a date or medicate Predictive analytics transcends human perception This book's final chapter answers the riddle What often happens to you that cannot be witnessed and that you can't even be sure has happened afterward but that can be predicted in advance Whether you are a consumer of it or consumed by it get a handle on the power of Predictive Analytics This book is easily understood by all readers Rather than a how-to-for-hands-on techies the book entices lay readers and experts alike by covering new case studies and the latest state of the art techniques

Environmental Impact Assessment of Buildings Wahidul Biswas, 2020-02-05 This Special Issue covers a wide range of areas including building orientation service life use of photocatalytically active structures and PV facades implications of transportation system building types i.e. high rise multilevel commercial residential life cycle assessment and structural engineering that need to be considered in the environmental impact assessment of buildings and the chapters include case studies across the globe Consideration of these strategies would help reduce energy and material consumption environmental emissions and waste generation associated with all phases of a building's life cycle Chapter 1 demonstrates that green star concrete exhibits the same structural properties as conventional concrete in Australia Chapter 2 showed that the use of TiO₂ as a photocatalyst on the surface of construction materials with a suitable stable binding agent such as aggregates would enable building walls to absorb NO_x from air This study found that TiO₂ has the potential to reduce ambient concentrations of NO_x from areas where this pollutant becomes concentrated under solar irradiation Chapter 3 presents the life cycle assessment of architecturally integrated glass glass photovoltaics in building facades to find the appropriate material composition for a multicolored PV facade offering improved environmental performance Chapter 4 shows that urban office buildings lacking appropriate orientation experienced indoor overheating Chapter 5 details four modeling approaches that were implemented to estimate buildings response towards load shedding Chapter 6 covers the life

cycle GHG emissions of high rise residential housing block to discover opportunities for environmental improvement Chapter 7 discusses an LCA framework that took into account variation in the service life of buildings associated with the use of different types of materials Chapter 8 presents a useful data mining algorithm to conduct life cycle asset management in residential developments built on transport systems
