Discourse Analysis and the Greek New Testament Stanley E. Porter, Matthew Brook O'Donnell, 2023-12-28 This volume

examines and outlines a Systemic Functional Linguistic SFL model of discourse analysis and its relationship to New Testament Greek. The book reflects upon how SFL has grown as a field since it was first introduced to New Testament Greek studies by Stanley E Porter in the 1980s. Porter and Matthew Brook O'Donnell first introduce basic concepts regarding discourse analysis and the major approaches towards it within New Testament studies. They then provide a detailed exploration of discourse analysis in terms of the textual metafunction beginning with an introduction to the architecture of language within SFL before exploring several individual elements within it. By focusing upon these individual components in particular theme and information structure, markedness and prominence and coherence and cohesive harmony, Porter and O'Donnell introduce and exemplify the major resources of the textual metafunction.

Multicultural Education in South Korea Mi Ok Kang, 2014-11-13

This book examines the political, ideological and socio-cultural politics underlying the 2009 National Multicultural Curriculum Reform and recent multicultural education policies in South Korea. Unlike the conservative groups in Western countries who argue that supporting cultural diversity and the cultural rights of minority groups balkanizes ethnic differences and divides the community, the New Rights and the conservative groups in South Korea have been very supportive of multicultural discourses and practices and have created many multicultural policy agendas geared toward ushering in what they have called the multicultural era. Through the Critical Discourse Analysis (CDA) of government multicultural policy documents, a range of media sources, the 2009 national curriculum reform policy documents and the 200 Korean language arts textbooks from 23 textbook publishers, *Multicultural Education in South Korea* examines how the conservative Korean government's interpretation and practices of multiculturalism have been infiltrated and challenged by progressive and migrant-led agents/agencies. The analysis of academic, official and popular discourses on migrant Others is focused on but not limited to The

multicultural era and struggles for hegemonic power Politics of multicultural knowledge control in education and society Formation of discourses on multicultural society and multicultural education Examining the national curriculum The politics of representing migrant Others and The hidden curriculum of multicultural education Limitations and possibilities The author's insightful discussion on the politics of knowledge education and teaching in multicultural societies will prove particularly useful to policy makers think tank officials and academic scholars in education Communication Yearbook 12 James A. Paul's Argumentation in Galatians Mika Hietanen, 2007-07-26 Galatians is a polemical letter which contains a substantial amount of argumentative passages Paul evidently wanted to persuade by using the best arguments possible to convince his addressees Using a state of the art method from the discipline of argumentation analysis Paul's argumentation can be analysed with a precision that standard exegetical methods cannot provide The pragma dialectical method developed in Amsterdam facilitates an analysis which is both descriptive and normative On the one hand Paul's argumentation can be described such as the relationship between premisses and conclusions the structure of the arguments and features relating to rhetorical strategy On the other hand the method makes it possible to evaluate Paul's argumentation against a set of rules for sound reasoning Fallacies and problematic arguments can be described accurately The spiritual nature of Paul's matters do not relieve him of rationality and Paul himself does not argue as if it did Paul's argumentation is found problematic in several respects There is a tension in the text Paul works a great deal to argue his claims while at the same time giving the impression that he merely wants to declare his standpoints and does not want to carry out an argumentation at all Many of the conclusions are presented as self evident even when they are not Paul's style is far from an ideal model of the resolution of a dispute Paul relies heavily on an argumentative strategy with maximal use of rhetorical devices The analysis shows that a contemporary method of argumentation analysis provides tools necessary to adequately describe and understand both individual arguments and the overarching strategy of the argumentation in a Pauline text
