Happiness A History Darrin M McMahon:

Happiness Darrin M. McMahon, 2006 An intellectual history of man's most elusive yet coveted goal Today we think of happiness as a natural right but people haven't always felt this way Historian McMahon argues that our modern belief in happiness is a recent development the product of a revolution in human expectations carried out since the eighteenth century He investigates that fundamental transformation by synthesizing two thousand years of politics culture and thought In ancient Greek tragedy happiness was considered a gift of the gods During the Enlightenment men and women were first introduced to the novel prospect that they could in fact should be happy in this life as opposed to the hereafter This recognition of happiness as a motivating ideal led to its consecration in the Declaration of Independence McMahon then shows how our modern search continues to generate new forms of pleasure but also paradoxically new forms of pain From publisher description

The Pursuit of Happiness Darrin M. McMahon, 2006 Happiness and its pursuit have been a constant source of fascination and attraction for thousands of years In ancient Greek tragedy happiness was considered a gift of the gods Now we consider it a right Why did this change and what does it tell us about our society In *Pursuit of Happiness* cultural historian Darrin McMahon offers a brilliant summation of the history of happiness and its evolution from divine gift to natural human entitlement Central to the development of Christianity ideas of happiness assumed their modern form during the Enlightenment McMahon follows this great search through to the present day showing how our modern quest for the holy grail of happiness continues to generate new forms of pleasure but also paradoxically new forms of pain Perfect happiness like the holy grail may exist only in our minds and McMahon helps us discover that as for Cervantes knight of sad countenance Quixote to travel is better than to arrive

History and Human Flourishing Darrin M. McMahon, 2023 The Humanities and Human Flourishing series publishes edited volumes that explore the role of human flourishing in the central disciplines of the humanities and to what degree the humanities can increase human happiness This volume examines the relationship between history and human flourishing and more broadly investigates the ways in which the arts and humanities are related to human well being The essays here represent the efforts of a varied and distinguished group of professional historians to consider a deceptively simple question what is the value of history for life Each author asks in what ways historians their work and the objects of their inquiry might contribute to human well being and how they might be encouraged to do so History in this volume refers not just to the past writ large but also to the discipline and practice of historical inquiry along with the production and consumption of works of historical representation Thinking of history in these ways the contributors address a wide variety of subjects in connection to issues of well being considering history across time and place as a vocation a source of the sublime a site of play and a repository of meaning with surprising analogues to religious experience Overall *History and Human Flourishing* uses personal experience insight into the professional and scholarly world of historians and a variety of historical periods and approaches to highlight the value of

Happiness in Nineteenth-Century Ireland Mary Hatfield, 2021-02-13 One of the most enduring tropes of modern Irish history is the MOPE thesis the idea that the Irish were the Most Oppressed People Ever Political oppression forced emigration and endemic poverty have been central to the historiography of nineteenth century Ireland This volume problematises the assumption of generalised misery and suggests the many different and often surprising ways in which Irish people sought out expressed and wrote about happiness Bringing together an international group of established and emerging scholars this volume considers the emerging field of the history of emotion and what a history of happiness in Ireland might look like During the nineteenth century the concept of happiness denoted a degree of luck or good fortune but equally was associated with the positive feelings produced from living a good and moral life Happiness could be found in achieving wealth fame or political success but also in the relief of lulling a crying baby to sleep Reading happiness in historical context indicates more than a simple expression of contentment In personal correspondence diaries and novels the expression of happiness was laden with the expectations of audience and author and informed by cultural ideas about what one could or should be happy about This volume explores how the idea of happiness shaped social literary architectural and aesthetic aspirations across the century CONTRIBUTORS Ian d Alton Shannon Devlin Anne Dolan Simon Gallaher Paul Huddie Kerron Luain David McCready Ciara Thompson Andrew Tierney Kristina Varade Mai Yatani **The Eudaimonic Turn** James O. Pawelski, D. J. Moores, 2013 In much of the critical discourse of the seventies eighties and nineties scholars employed suspicion in order to reveal a given text's complicity with various undesirable ideologies and or psychopathologies Construed as such interpretive practice was often intended to demystify texts and authors by demonstrating in them the presence of false consciousness bourgeois values patriarchy orientalism heterosexism imperialist attitudes and or various neuroses complexes and lacks While it proved to be of vital importance in literary studies suspicious hermeneutics often compelled scholars to interpret eudaimonia or well being variously conceived in pathologized terms At the end of the twentieth century however literary scholars began to see the limitations of suspicion conceived primarily as the discernment

of latent realities beneath manifest illusions In the last decade often termed the post theory era there was a radical shift in focus as scholars began to recognize the inapplicability of suspicion as a critical framework for discussions of eudaimonic experiences seeking out several alternative forms of critique most of which can be called despite their differences a hermeneutics of affirmation In such alternative reading strategies scholars were able to explore configurations of eudaimonia not by dismissing them as bad politics or psychopathology but in complex ways that have resulted in a new eudaimonic turn a trans disciplinary phenomenon that has also enriched several other disciplines The Eudaimonic Turn builds on such work offering a collection of essays intended to bolster the burgeoning critical framework in the fields of English Comparative Literature and Cultural Studies by stimulating discussions of well being in the post theory moment The volume consists of several examinations of literary and theoretical configurations of the following determinants of human subjectivity and the role these play in facilitating well being values race ethics morality aesthetics class ideology culture economics language gender spirituality sexuality nature and the body Many of the authors compellingly refute negativity bias and pathologized interpretations of eudaimonic experiences or conceptual models as they appear in literary texts or critical theories Some authors examine the eudaimonic outcomes of suffering marginalization hybridity oppression and or tragedy while others analyze the positive effects of positive affect Still others analyze the aesthetic response and or the reading process in inquiries into the role of language use and its impact on well being or they explore the complexities of strength resilience and other positive character traits in the face of struggle suffering and othering *The Color of Equality* Devin J.

Vartija,2021-08-06 Enlightenment thinkers bequeathed a paradoxical legacy to the modern world they expanded the purview of equality while simultaneously inventing the modern concept of race The Color of Equality makes sense of this tension by demonstrating that the same Enlightenment impulse the naturalization of humanity underlay both of these trends **Real Happy** Mike Hayes,Dr. Jeffrey Garner,2024-01-08 Are you really happy When almost every human choice is made with happiness in mind why do we continue to miss out on lasting happiness Perhaps happiness isn't something we pursue but rather something that ensues What if happiness is not stuff we fill up on but something we make room for Real happiness may not be something out there at all material but something in here spiritual In this compelling narrative best selling author Mike Hayes and Dr Jeffrey Garner journey through the eight beloved Beatitudes from Jesus revolutionary Sermon on the Mount Religious and non religious readers alike will smile and feel inspired in learning that Jesus despite popular understandings was in fact deeply invested in human happiness Jesus happiness however consoles sorrow embraces emptiness confronts injustice and is even present in our suffering all that we avoid in our search for happiness Aptly reframing the Beatitudes as happy oracles Mike and Jeffrey share personal stories and historical insights that optimize Jesus happy message for a 21st century audience This book challenges our cultural conceptions of happiness and beautifully guides the reader into Jesus Real Happy life *Sources for the History of Emotions* Katie Barclay,Sharon Crozier-De Rosa,Peter N.

We Are Better Than This Edward D. Kleinbard, 2014-08-29 *We Are Better Than This* fundamentally reframes budget debates in the United States Author Edward D Kleinbard explains how the public's preoccupation with tax policy alone has obscured any understanding of government's ability to complement the private sector through investment and insurance programs that enhance the general welfare and prosperity of our society at large He argues that when we choose how government should spend and tax we open a window into our fiscal soul because those choices are the means by which we express the values we cherish and the regard in which we hold our fellow citizens Though these values are being diminished by short sighted decisions to starve government strategic government spending can directly make citizens happier healthier and even wealthier Expertly combining the latest economic research with his insider knowledge of the budget process into a simple yet compelling narrative he unmasks the tax mythologies and false arguments that too often dominate contemporary discourse about budget policies Large quantities of comparative data are succinctly distilled to situate the United States among its peer countries so that readers can judge for themselves whether contemporary budget choices really reflect our aspirational fiscal soul Kleinbard's presentation takes a multi disciplinary approach drawing on economics finance law political science and moral philosophy He uniquely weaves economic research and moral philosophy together by emphasizing our welfare not just our national income and by contrasting the actual beliefs of Adam Smith a great moral philosopher with the cartoon version of the man presented by proponents of the most extreme forms of private market triumphalism

Woods, 2014-08-11 The sectional conflict over slavery in the United States was not only a clash between labour systems and political ideologies but also a viscerally felt part of the lives of antebellum Americans This book contributes to the growing field of emotions history by exploring how specific emotions shaped Americans perceptions of and responses to the sectional conflict in order to explain why it culminated in disunion and war Emotions from indignation to jealousy were inextricably embedded in antebellum understandings of morality citizenship and political affiliation Their arousal in the context of political debates encouraged Northerners and Southerners alike to identify with antagonistic sectional communities and to view the conflicts between them as worth fighting over Michael E Woods synthesizes two schools of thought on Civil War causation the fundamentalist which foregrounds deep rooted economic cultural and political conflict and the revisionist which stresses contingency individual agency and collective passion
