The Quest for the Inner Human Steven H. Propp, 2013-12-03 Psychology means the study of the soul it is the social science concerned with investigating who we are why we have certain feelings and why we do the things we do Are we no more than a vast assembly of nerve cells and their associated molecules Is biology our genetic inheritance destiny or does social upbringing play a crucial role What are the roles played by Nature and by Nurture Are we purely physical beings or is there an aspect that can be called spiritual This thought provoking novel takes you on a journey of intellectual and emotional exploration considering along the way questions that we've all asked ourselves such as Is it true that we only use 10% of our brains Does playing classical music for infants increase their intelligence Do crime rates go up during a full moon Can hypnosis or post hypnotic suggestions make us do something we wouldn't normally do Does subliminal advertising influence us to buy products Are our memories stored indelibly almost like a tape recorder What causes memory lapses as we age Can repressed traumatic memories be recovered through hypnosis Do some people have multiple personalities How can I tell if someone has a neurosis or a psychosis Do men have an inner feminine side and women an inner masculine Are there innate psychological differences between males and females The four main characters in this book will guide you through a diverse

and sometimes bewildering world of differing approaches to answering such questions such as Freudian Jungian and Adlerian Humanistic Existential and Transpersonal as well as Cognitive Emotive and Behaviorist Along the way you will learn about the developmental stages proposed by psychologists such as Erikson Kohlberg Piaget and Fowler and even explore some of the questions currently being asked by both neuroscientists and philosophers of the mind Start reading to begin your study of our innermost selves History and Systems Psychology Brennan,1994-01-01 **Where Does Mind End?** Marc Seifer,2011-11-28 A new comprehensive model of mind and its nearly infinite possibilities Recasts psychology as a vehicle not for mental health but for higher consciousness Shows that we have consciousness for a reason it is humanity s unique contribution to the cosmos Integrates the work of Freud Jung Gurdjieff Tony Robbins Rudolf Steiner the Dalai Lama as well as ESP the Kabbalah tarot dreams and kundalini yoga The culmination of 30 years of research Where Does Mind End takes you on an inward journey through the psyche exploring the highest states of consciousness the insights and theories of ancient and modern philosophers psychologists and mystics the power of dreams chi energy tarot and kundalini yoga and proof of telepathy and other facets of parapsychology to explain the mystery of consciousness and construct a comprehensive model of mind and its nearly infinite possibilities Starting with the ancients and early philosophers such as Zoroaster Aristotle Descartes and Leibniz the author examines models of mind that take into account divine and teleological components the problem and goal of self understanding the mind body conundrum and holographic paradigms Seifer then moves to modern times to explain the full range of Freud s psychoanalytic model of mind exploring such ideas as the ego superego and id the unconscious creativity and self actualization Using Freud s psychoanalytical model as framework he reveals an overarching theory of mind and consciousness that incorporates such diverse concepts as Jung s collective psyche ESP the Kabbalah Gurdjieff s ideas on behaviorism and the will the philosophies of Wilhelm Reich P D Ouspensky and Nikola Tesla the personality redevelopment strategies of Tony Robbins and the Dalai Lama s and Rudolf Steiner s ideas on the highest states of consciousness Recasting psychology as a vehicle not for mental health but for higher consciousness he shows that by casting off the mechanical mental operation of day to day life we naturally attain the self integration to which traditional psychology has long aspired By entering the true path to fulfillment of the soul s will we help the planet by transforming ourselves and raising our energy to a higher realm *The Essential Brunswik* Kenneth R. Hammond,Thomas R. Stewart,2001-09-20 Egon Brunswik is one of the most brilliant creative and least understood and appreciated psychologists philosophers of the 20th century This book presents a collection of Brunswik s most important papers together with interpretive comments by prominent scholars who explain the intent and development of his thought This collection and the accompanying diverse examples of the application of his ideas will encourage a deeper understanding of Brunswik in the 21st century than was the case in the 20th century The 21st century already shows signs of acceptance of Brunswikian thought with the appearance of psychologists with a different focus emulation of physical science is of less importance and

positive contributions toward understanding behavior outside the laboratory without abandoning rigor are claiming more notice As a result Brunswik s theoretical and methodological views are already gaining the attention denied them in the 20th century The plan of this book is to provide for the first time in one place the articles that show the origins of his thought with all their imaginative and creative spirit as well as thoughtful scholarly interpretations of the development meaning and application of his ideas to modern psychology Thus his views will become more understandable and more widely disseminated as well as advanced through the fresh meaning given to them by the psychologists of the 21st century
