Lady in Shining Armor Ramesh Malayappan, 2008-05-24 This book was first written and published in 2008 during the candidacy of Hillary Clinton who aspired to become America's first woman President. The book profiles twelve women heads of government of countries around the world and shows how women have fared when they have been entrusted with the highest executive power of the land. These examples show that when women are trusted by being elected to the highest executive positions of their respective countries, they have risen to the occasion and proven worthy of that trust. Lawyers with Legacies Patricia Wilhite-McCartney, 2007-10 Attorney Patricia Wilhite McCartney answers that question in *Lawyers with Legacies* where she explicates the lives of thirty-one lawyers who left an eternal impact of Christian faith. Many of these prestigious advocates were ministers, founders of universities, and able to sway the jury on the court's most important legal decisions of all time. *Lawyers with Legacies* honors and celebrates these lawyers whose commitment to God defined their lives and left a lasting mark in world history.

How Planets Affect Our Lives Naresh Gathani, 2024-03-07 This book, based on 14 chapters, insights into how planets affect our lives. It is for all readers over the age of 12 and requires no prior knowledge of the subject matter. It deals with the concept that every moment in time has its unique Genetic Blueprint, and this blueprint is made up of Genes referred to as Aspects in the Planetary context. The Genetic blueprint will express itself in a predictable and timely way, just like the Genes in our Genetics will express themselves in our lifetime. The book starts with an explanation of how the planets can be monitored and the data used to understand their impact on us and covers the interplanetary relationships coherently describing planet attributes from a profound perspective. By using appropriate and novel analogies, it explains the basic concepts as well as the more advanced ones. The book uses innovative concepts on Birth Charts, Event Charts, Month Forecasts, Year Forecasts, and Relationship Charts. Further, the book moves on to discuss real-life case studies relevant to the subject. The discussed cases include appropriate aspects of Margaret Thatcher, John F. Kennedy, Bill Melinda Gates, Tiger Woods, The Tucson Shooting, Gabby Giffords, The 9/11 Terror Attack, The Japan Earthquake, Tsunami, The First World War, The Second World War, The Attacks on Hiroshima and Nagasaki, A corporate case of BP Plc. All research is presented in appropriate Graphics and includes personally developed Interpretation Tables as a reference source. I am sure all readers will be able to relate to the concept and benefit from the insights personally. The evidence presented is accurate, and readers will find the evidence absolutely compelling and justifying my claim that Planets play a very predictable and timely role in our lives. The book identifies the planets implicated in our day-to-day life happenings and the same for world events.

Green Infrastructure for Sustainable Urban Development in Africa John

Abbott,2013-07-03 This book shows for the first time how green infrastructure can work in an African urban context On one level it provides a major rethinking of the role of infrastructure in urban society since the creation of networked infrastructure in the early twentieth century On another it explores the changing paradigms of urban development through the fundamental question of how decisions are made With a focus on Africa s fast growing secondary towns where 70 per cent of the urban population live the book explains how urban infrastructure provides the key to the relationship between economic development and social equity through the mediation of natural resources Adopting this view enables investment to be channelled more effectively to provide the engine for economic growth while providing equitable services for all residents At the same time the mediation of resource flows integrates the metabolism of the city into the wider ecosystem This vision leads to a new way of thinking about infrastructure giving clear definition to the concept of green infrastructure On the basis of research gathered throughout an extensive career John Abbott draws in particular from his experience in Ethiopia to demonstrate the ways in which infrastructure needs to respond to the economies societies and natural environments of twenty first century urban Africa

Second That Emotion Jeremy D. Holden,2012-09-18 An advertising and communications expert traces the fascinating process whereby a passion for an idea a politician a celebrity or a brand gives rise to a set of illogical beliefs that becomes the basis for a powerful movement Conventional wisdom has it that spin doctors and Madison Avenue are responsible for manipulating our thoughts causing us to endorse ideas or buy products that we would otherwise reject outright Holden shows that while advertising and propaganda can provide a spark and social media provides the kindling individuals create consumer political and cultural trends based more often than not on thinking that they know logically to be flawed For businesspeople who want to see their company or brand break through this book is both essential and entertaining reading For the rest of us the author provides a window into our decision making processes and how emotion based illogical leaps drive our support for movements whether they are political commercial or related to popular culture
