German speaking lands by Peripatetic authors like Albert the Great Ulrich of Strassburg and Dietrich of Freiberg This volume aims to provide a basis for further research and discussion of this unduly overlooked commentary whose historical philosophical importance as an attempt to refound Western metaphysics is beginning to be recognized The publication of this volume has received the generous support of the European Research Council ERC under the European Union s Horizon 2020 research and innovation programme through the ERC Consolidator Grant NeopLAT A Comparative Analysis of the Middle East Byzantium and the Latin West 9th 16th Centuries grant agreement No 771640 www.neoplat.eu the volume displays various aspects of the richness hidden in this Commentary on Proclus the contributions mentioned here are merely representative of such richness Nonetheless a desideratum of the research on Berthold remains a closer analysis of his polemical relations with his still unknown adversaries Giuseppe Thomas Vitale Thomas Institut der Universit t zu K ln *Recherches de Th ologie et Philosophie m di vales* 89 2 *Plotinus' Legacy* Stephen Gersh, 2019-04-25 Using a series of case studies from across European philosophical traditions this book traces the influence of Neoplatonism over the centuries

Hedesan, Tim Rudbøg, 2021-05-10 This collection explores the role of innovation in understanding the history of esotericism It illustrates how innovation is a mechanism of negotiation whereby an idea is either produced against or adapted from an older set of concepts in order to respond to a present context Featuring contributions from distinguished scholars of esotericism it covers many different fields and themes including magic alchemy Rosicrucianism Theosophy Tarot apocalypticism and eschatology Mesmerism occultism prophecy and mysticism *Sense-Making* Sheryl Boyle, Genevieve Collins, David Howes, 2025-08-22 In this highly innovative work the senses are liberated from the confines of the present to serve as vehicles for accessing other historical periods and imagined futures Sense Making builds on the burgeoning field of sensory ethnography by introducing a pair of methodologies sensory re construction and sensorial extrapolation Cexpressly devised to facilitate time travel The first part offers a survey and critique of extant work in sensory archeology and sensory futures The second part presents a case study of sensory re construction in action focusing on Thornbury Castle 1508 1521 in the UK The third part probes the life of the senses on the final frontier the next habitat of humanity namely outer space These sensory case studies are not purely architectural or purely futuristic They are at the same time exercises in arts based practice or research creation where the authors do not just carry out bibliographic research and write about pasts and futures they make them Sense Making is necessary reading for the international community of sensory studies scholars as well as those with interests spanning material culture museum and heritage studies visual and auditory culture experimental psychology design and digital technology **Medicine and the Body in Early Modern Europe** Michael Stolberg, **The**

Hero's Life Choice. Studies on Heracles at the Crossroads, the Judgement of Paris, and Their Reception Malcolm Davies, 2023-09-04 Two allegorical ancient Greek stories about a young hero's career defining choice are shown in this book to have later been appropriated to radically differing effects. E.g. a male's choice between female personifications can morph into a female's choice between the same or between various male personifications. Never before have so many instances of this process from art literature music even landscape gardening been culled. Illustrations mainly colour many brought into this context for the first time are conveniently incorporated into the text thus mimetically mirroring a central theme of the book: the process of visualising the verbal verbalising the visual. Creational Theology and the History of Physical Science: The Creationist Tradition from Basil to Bohr Christopher B. Kaiser, 2021-12-06 This volume documents the role of creational theology in discussions of natural philosophy medicine and technology from the Hellenistic period to the early twentieth century. Four principal themes are the comprehensibility of the world the unity of heaven and earth the relative autonomy of nature and the ministry of healing. Successive chapters focus on Greco-Roman science medieval Aristotelianism early modern science the heritage of Isaac Newton and post-Newtonian mechanics. The volume will interest historians of science and historians of the idea of creation. It simultaneously details the persistence of tradition and the emergence of modernity and provides the historical background for later discussions of creation and evolution. *Astrology through History* William E. Burns, 2018-07-20 Alphabetically arranged entries cover the history of astrology from ancient Mesopotamia to the 21st century. In addition to surveying the Western tradition the book explores Islamic Indian East Asian and Mesoamerican astrology. The field of astrology is growing rapidly as historians recognize its centrality to the intellectual life of the past and sociologists and anthropologists treat its importance in a number of modern cultures. Despite the historical and cultural significance of the subject most reference works on astrology focus on instructional techniques and are written by astrologers with little or no interest in the history of the topic. This book instead offers an objective treatment of astrology across world history from ancient Mesopotamia to the present. The book provides alphabetically arranged entries by expert contributors writing on such topics as horoscopes court astrologers Renaissance astrology and comets. While it considers the Western tradition it also treats Islamic Indian East Asian and Mesoamerican astrology. In doing so it explores the role of astrology in shaping science literature religion art and other defining cultural traditions. Sidebars offer excerpts from various historical texts while entries provide suggestions for further reading. Health Peter Adamson, 2019 From antiquity to the early modern period many philosophers also studied anatomy and medicine or were medical doctors themselves yet the history of philosophy and of medicine are pursued as separate disciplines. This book departs from that practice gathering contributions by both historians of philosophy and of medicine to trace the concept of health from ancient Greece and China through the Islamic world and to modern thinkers such as Descartes and Freud. Through this interdisciplinary approach *Health* demonstrates the synchronicity and overlapping histories of these two disciplines. From antiquity to the Renaissance

contributors explore the Chinese idea of qi or circulating vital breath ideas about medical methodology in antiquity and the middle ages and the rise and long lasting influence of Galenic medicine with its insistence that health consists in a balance of four humors and the proper use of six non naturals including diet exercise and sex In the early modern period mechanistic theories of the body made it more difficult to explain what health is and why it is more valuable than other physical states However philosophers and doctors maintained an interest in the interaction between the good condition of the mind and that of the body with Descartes and his followers exploring in depth the idea of medicine for the mind despite their notorious mind body dualism In the eighteenth and nineteenth centuries scientific improvements in public health emerged along with new ideas about the psychology of health notably with the concept of sensibility and Freud s psychoanalytic theory The volume concludes with a critical survey of recent philosophical attempts to define health showing that both descriptive or naturalistic and normativist approaches have fallen prey to objections and counterexamples As a whole *Health A History* shows that notions of both physical and mental health have long been integral to philosophy and a powerful link between philosophy and the sciences

"Be Sober and Reasonable" Michael Heyd,2000-09-29 *Be Sober and Reasonable* deals with the theological and medical critique of enthusiasm in the seventeenth and early eighteenth centuries and with the relationship between enthusiasm and the new natural philosophy in that period Enthusiasm at that time was a label ascribed to various individuals and groups who claimed to have direct divine inspiration prophets millenarists alchemists but also experimental philosophers and even philosophers like Descartes The book attempts to combine the perspectives of Intellectual history Church history history of medicine and history of science in analysing the various reactions to enthusiasm The central thesis of the book is that the reaction to enthusiasm especially in the Protestant world may provide one important key to the origins of the Enlightenment and to the
