Halal And Haram Lawful And Unlawful Things:

Handbook of Halal Food Production Mian N. Riaz, Muhammad M. Chaudry, 2018-09-03 Until now books addressing Halal issues have focused on helping Muslim consumers decide what to eat and what to avoid among products currently on the market. There was no resource that the food industry could refer to that provided the guidelines necessary to meet the Halal requirements of Muslim consumers in the United States and abroad. *Handbook of Halal Food Production* answers this need by summarizing the fundamentals of Halal food production, serving as a valuable reference for food scientists, food manufacturers, and other food industry professionals. This text delivers a wealth of information about Halal food guidelines for food production, domestic and international food markets, and Halal certification. Among chapters that cover production requirements for specific foods such as meat and poultry, fish and seafood, and dairy products, there are other chapters that address global Halal economy, Muslim demography, and global Halal trade and comparisons among Kosher, Halal, and vegetarian. In addition, the book presents Halal food laws and regulations, HACCP, and Halal and general guidelines for Halal food production. For persons targeting the Halal food market for the first time, this book is particularly valuable, providing understanding of how to properly select, process, and deliver foods. In light of the increasing worldwide demand for Halal food service, branded packaged food, and direct marketed items, this volume is more than an expert academic resource; it is a beneficial tool for developing new and promising revenue streams. Both editors are food scientists who have practical experience in Halal food requirements and Halal certification, and the contributors are experts in the Halal food industries.

The Halal Food Handbook Yunes Ramadan Al-Teinaz, Stuart Spear, Ibrahim H. A. Abd El-Rahim, 2020-01-03 A unique handbook providing a set of good practice standards for both producers and consumers of Halal food. This accessible, authoritative book covers all aspects of Halal from its origins through to how we expect Halal to develop in the coming years. It explains what Halal is, where it came from, how it is practiced, and by whom. In addition to putting Halal in a religious and cultural context, the book provides practical standards for those working in the Halal trade. It explains why there are so many different interpretations of Halal and why this needs to be resolved if international trade is to be developed. Each chapter in *The Halal Food Handbook* is written by leading experts in their particular field of study. The first one discusses how regulatory bodies have failed to stem the mis-selling and adulteration of Halal foods. The next chapters cover the slaughter process and issues around good practice. The book then looks at regulators covering Sharia law, UK national laws, and the EU, and outlines the legal framework for enforcing the law. It also compares and contrasts different types of religious slaughter for faith foods, examines attempts to set an international standard for trade, and discusses pork adulteration in Halal foods. The final chapter covers other aspects of Halal, including cosmetics, tourism, lifestyle, and banking, and finishes with a look at what the future holds for Halal. Written and edited by leading international experts in Halal, who are backed by the Muslim Council of Britain, *Presents a set of good practice standards for both producers and consumers of Halal food. Covers the*
