acceptance and eventually dominated the domestic clock market During the 1920 s battery powered electromechanical clocks were developed to compete with the emerging AC electric clocks Electromechanical clocks freed their owners from weekly winding chores and some were more accurate than the traditional spring driven household clocks Inevitably the electromechanical clocks became obsolete as synchronous electric clocks gained wide acceptance Through the 1930 s and 40 s synchronous electric clocks continued to account for a large share of the domestic clock market These clocks ranged from simple alarms and shelf timepieces to chime clocks and even floor clocks It wasn t until the 1960 s that traditional spring and weight driven clocks regained popularity ending the reign of AC electric clocks They remain collector s items that are worth maintaining and repairing
