Weed Science Godfrey Pearlson, 2020-07-11 WHAT DO WE KNOW ABOUT MARIJUANA AND HOW DO WE KNOW IT Marijuana is the most frequently consumed illicit drug worldwide with over 158.8 million users according to the UN Responding to public pressure the US federal government is likely to legalize recreational marijuana within the next few years With increasing numbers of people using cannabis both medically and recreationally there are many looming questions that only science can answer These include What is likely to happen both good and bad if the US legalizes marijuana What are some simple science based rules to separate fact from fiction and to help guide policy in the highly contentious marijuana debate Exactly what is cannabis doing in the brain that gets us high A journey through THC neuroscience Does cannabis really have medical benefits what is the evidence To what extent does cannabis impair driving Can smoking marijuana in adolescence affect IQ or risk for developing schizophrenia Is marijuana safe to use during pregnancy Reviews the endocannabinoid system and why our bodies are full of weed receptors Introduces readers to the various forms of marijuana flower dabs hash edibles shatter vapes tinctures oils and synthetics THC CBD and terpenes Demonstrates how and why cannabis affects different people very differently Discusses how MRI and PET scans can help show the effects of marijuana on the brain Discusses long term effects of adolescent and adult cannabis use Examines the evidence for cannabis's role in increasing the risk for schizophrenia like illnesses

Salvia Biotechnology Vasil Georgiev, Atanas Pavlov, 2018-03-19 The genus *Salvia* represents nearly 1 000 species that are widely distributed around the world It is the largest in the Lamiaceae family Traditionally infusions of *Salvia* species have been widely used to treat oral inflammation throat and headaches and digestive disturbances in various folklore and ethno medicine practices worldwide The antispasmodic antiseptic and hypoglycemic effects of their extracts have been recognized by the ancient healers a long time ago before the development of modern medicine With the advances in phytochemistry and pharmacology terpenes polyphenols and volatile compounds have been recognized as the source of bioactivity in *Salvia* extracts Nowadays because of their valuable pharmaceutical and nutraceutical properties many *Salvia* species have been widely used as ingredients in

food pharmacy and cosmetic industries The economic importance of Salvia plants continues to increase following closely the growing interest to the concept for modern healthy lifestyle based on prevention by consuming quality foods and nutraceutical supplements of natural origin However the growing demand has led to overexploitation of natural habitats and in the last few years many wild growing Salvia species have shrunk or fallen under threat Obviously to deal with that problem and to prevent ecological crisis there is an urgent need for alternative renewable sources of Salvia biomass Plant biotechnology can provide a wide range of tools for development of economically feasible continuous production of standardized valuable phytochemicals Plant in vitro culture technology is a powerful method for continuous production of plant secondary metabolites under controlled conditions recently adapted to various Salvia species Salvia in vitro systems are harmless to natural plant populations and can be grown independently of environmental factors geographical latitude climatic change and seasonal variations Several bioactive metabolites from rare and endangered Salvia plants can be produced by employing different plant in vitro systems However the researches on development of large scale biotechnology based on Salvia in vitro systems are still in early stages and many points still have to be addressed before the commercialization to take place In this book we intend to summarize the recent achievements in research with Salvia in vitro systems as biological matrixes for the production of pharmaceutically important secondary metabolites Further we invited leading experts to present their recent studies on phytochemistry ethnobotanical and ethnopharmacological aspects of genus Salvia Safety and legal issues related to implementation of Salvia plants and in vitro cultures extracts in foods cosmetics and pharmaceutical products will be discussed as well

new light on the role of various environmental factors in regulating the metabolic adaptation of medicinal and aromatic plants Many of the chapters present cutting edge findings on the contamination of medicinal plants through horizontal transfer as well as nanomaterials and the biosynthesis of pharmacologically active compounds In addition the book highlights the impacts of environmental factors e g high and low temperature climate change global warming UV irradiation intense sunlight and shade ozone carbon dioxide drought salinity nutrient deficiency agrochemicals waste heavy metals nanomaterials weeds pests and pathogen infections on medicinal and aromatic plants emphasizing secondary metabolisms In recent years interest has grown in the use of bioactive compounds from natural sources Medicinal and aromatic plants constitute an important part of the natural environment and agro ecosystems and contain a wealth of chemical compounds

known as secondary metabolites and including alkaloids glycosides essential oils and other miscellaneous active substances. These metabolites help plants cope with environmental and/or external stimuli in a rapid reversible and ecologically meaningful manner. Additionally, environmental factors play a crucial role in regulating the metabolic yield of these biologically active molecules. Understanding how medicinal plants respond to environmental perturbations and climate change could open new frontiers in plant production and in agriculture where successive innovation is urgently needed due to the looming challenges in connection with global food security and climate change. Readers will discover a range of revealing perspectives and the latest research on this vital topic.
