This is necessary because we cannot contemplate companies existing without their environment. If companies do not involve themselves in such undertakings they are in danger of isolating themselves from the shareholder. That in turn creates a problem for mobilizing new ideas and receiving feedback from their environment. In this respect the contributions of academics from international level together with the private sector and business managers are eagerly awaited on topics and sub topics within Strategies for Tourism Industry Micro and Macro Perspectives

Alternatives to Privatizing Public Education and Curriculum Daniel Ness, Stephen J. Farenga, 2017-03-16

Through conversations in honor of Dale D Johnson this book takes a critical view of the monoculture in curriculum and policy that has developed in education with the increase of federal funding and privatization of services for public education and examines the shift from public interest and control to private and corporate shareholder hegemony Most states educational responsibilities assessment of constituents curriculum development and instructional protocols are increasingly being outsourced to private enterprises in an effort to reduce state budgets These enterprises have been given wide access to state resources such as public data from state sanctioned testing results field testing rights to public schools and financial assistance Chapter authors challenge this paradigm as well as the model that has set growing premiums on accountability and performance measures Connecting common impact between the standards movement and the privatization of education this book lays bare the repercussions of high stakes accountability coupled with increasing privatization Winner of The Society of Professors of Education Book Award 2018 Service Innovation in Design Studies and Practices Ahmad Zuhairi Abdul Majid, 2022-07-23 This book is a guide for designers in industrial design as well as in other areas such as architecture interior design and visual communication in the area of digital media It is also suitable for service bidders as they also need to understand how to get the quality of care required with the aid of a designer who will be mindful on the intangible aspects of service As with other design areas service design often gives priority to studying prior to the application of the concept of innovation or service enhancement This is especially important since knowing the needs of the customers is the cornerstone of every discipline of design It is desirable for a designer to review the needs of customers and service markets before considering the planning process Service design is an element that has been implemented ever since a long time ago but it is unlikely that its application can be done quickly as there are combinations of different fields that need to contribute ideas and skills to service delivery Service design used to be a term that does not exist as service providers only discussed the concepts of to be built to be created to be launched and so on when service was to be introduced Thus this book aims to bring back service design to the limelight so as to not only educate designers but also to remind service providers that it is also and always will be an important part of service
