He Wanted The Moon Madness And Medical Genius Of Dr Perry Baird His Daughters Quest To Know Him Mimi:

He Wanted the Moon Mimi Baird, Eve Claxton, 2016-02-16 Soon to be a major motion picture from Brad Pitt and Tony Kushner A Washington Post Best Book of 2015 A mid century doctor's raw unvarnished account of his own descent into madness and his daughter's attempt to piece his life back together and make sense of her own Texas born and Harvard educated Dr Perry Baird was a rising medical star in the late 1920s and 1930s Early in his career ahead of his time he grew fascinated with identifying the biochemical root of manic depression just as he began to suffer from it himself By the time the results of his groundbreaking experiments were published Dr Baird had been institutionalized multiple times his medical license revoked and his wife and daughters estranged He later received a lobotomy and died from a consequent seizure his research incomplete his achievements unrecognized Mimi Baird grew up never fully knowing this story as her family went silent about the father who had been absent for most of her childhood Decades later a string of extraordinary coincidences led to the recovery of a manuscript which Dr Baird had worked on throughout his brutal institutionalization confinement and escape This remarkable document reflecting periods of both manic exhilaration and clear headed health presents a startling portrait of a man who was a uniquely astute observer of his own condition struggling with a disease for which there was no cure racing against time to unlock the key to treatment before his illness became impossible to manage Fifty years after being told her father would forever be ill and away Mimi Baird set off on a quest to piece together the memoir and the man In time her fingers became stained with the lead of the pencil he had used to write his manuscript as she devoted herself to understanding who he was why he disappeared and what legacy she had inherited The result of his extraordinary record and her journey to bring his name to light is *He Wanted the Moon* an unforgettable testament to the reaches of the mind and the redeeming power of a determined heart

Never Again Donald L. Lang, PhD, 2022-01-28 Freedom The Berber symbol adorns a monument outside the Museum of Slavery in The Gambia It's also an emblem of hope that never again will such wrongheaded political mindsets cloud our judgment about rights and freedoms now enshrined in human rights charters Yet those fervent words never again

as author Donald L Lang points out are also the title and rallying cry of a recent book on the aftermath of yet another mass high school shooting Where rights and freedoms are concerned do politics trump all Never Again Why Human Rights Charters Fail to Fulfill Their Mandates explores the ongoing failures in the efficacy of human rights charters in fulfilling their mandates At the outset he plunges the reader into a deep well of analysis starting with the first flaw in these charters the human mind At the book s core is the wisdom and guidance of Roger Bacon concerning the pursuit of truth The book grapples with monumental questions such as What makes a being a human being and not something else Harking back to the philosophies of Marcus Aurelius and Immanuel Kant complemented by modern thinkers such as Yuval Noah Harari and Robert B Reich the author teases out the true meaning of the word good Lang questions the authenticity in which political leaders philosophers spiritual guides big thinkers business leaders scientists and the book s primary audience educators meaningfully deal with humanity s most fundamental issues He posits the reality that what we as humans value lies on a continuum between authentic good and inauthentic good or evil Lang s solution includes proposing rational based humanism a new philosophy of education to rethink materialistic measures of success with the aim of equality of life for all
