Marine Biodiversity Levinton:

Marine Biology Jeffrey S. Levinton, 2009 Levinton's Marine Biology Third Edition is the most up to date text for the sophomore/junior/senior level marine biology for biology majors course. The text is characterized by its exceptionally clear and conversational writing style and its comprehensive coverage that presents organismal and ecosystem ecology topics from an evolutionary perspective. A hallmark feature of this text is its principles-driven approach in which a particular organism and its habitat are discussed within the context of its fundamental biological processes: what they eat, who is the predator/prey, the organism's internal metabolism, and its process of reproduction. The Third Edition has been thoroughly revised and is now more engaging, up to date, and accessible than ever. Of particular note, the revision features a new full-color illustration program. In addition, all of the chapters are updated and include the most important developments from the field. Finally, students will find new pedagogical aids to help them master and retain the information. *Seafloor Geomorphology as*

Benthic Habitat Peter Harris, Elaine Baker, 2011-11-28 Annotation: This book provides a synthesis of seabed geomorphology and benthic habitats based on the most recent up to date information. Case studies from around the world are presented.

Invitation to Oceanography Paul R. Pinet, 2019-10-10 Invitation to Oceanography Eighth Edition provides a modern and student-friendly introduction to ocean science and has been updated to include new and expanded information on blue whales, plastic pollution, and the future of oceans in the wake of climate change. It also features updated tables and graphs with the most recent scientific data. Please note: the eBook version does not include access to Navigate 2 Advantage Access, which can be purchased separately directly from the publisher. **Marine Biodiversity and Ecosystem Function** J. Frederick Grassle, 1991

Marine Biology: Biodiversity, Ecology, 2nd Ed. (with CD-ROM); and Exploring Marine Biology: Laboratory and Field Exercises Distinguished Professor of Ecology and Evolution Jeffrey S. Levinton, Jeffrey S. Levinton, Paul Haefner, 2001-12-13 This package includes Jeffrey S. Levinton's successful textbook *Marine Biology: Function, Biodiversity, Ecology* Second Edition and its accompanying laboratory manual Paul A. Haefner's *Exploring Marine Biology*. Together, these books provide an exciting exploration of marine animals and their habitats through elaborate photographs and illustrations and a broad range of effective exercises.
