Aero Detail 24 Nakajima Ki 84 Frank Hayate:

Fighters of the Dying Sun Justo Miranda, 2021-07-11 The first B 29 flew over Tokyo on 1 November 1944 It was a photographic reconnaissance aircraft ironically named Tokyo Rose The Ki 44 fighters of the 47th Sentai took off to intercept it but as it turned out the Superfortress flew at such an altitude and speed that they could not reach it The Ki 44 II Otsu had been specifically designed for this type of interception and could reach the astonishing rate of climb of 5 000 m in four minutes however it was not good enough During the following ten months a devastating bombing campaign of thousands of Superfortresses destroyed 67 Japanese cities and half of Tokyo The cultural shock and the political consequences were huge when it was realised that the Japanese industry was not able to produce the specially heat and stress resistant metallic alloys that were required to manufacture the turbo superchargers needed by the fighters in charge of defending the Japanese mainland They lacked the essential chromium and molybdenum metals to harden the steel This fact thwarted the manufacturing of numerous advanced projects of both conventional fighters and those derived from the transfer of German technology fitted with turbojets and rocket engines They are thoroughly described in this book 山口正典, 1999
