Urban Soils Rattan Lal, B. A. Stewart, 2017-10-18 Globally 30% of the world population lived in urban areas in 1950 54% in 2016 and 66% projected by 2050 The most urbanized regions include North America Latin America and Europe Urban encroachment depletes soil carbon and the aboveground biomass carbon pools enhancing the flux of carbon from soil and vegetation into the atmosphere Thus urbanization has exacerbated ecological and environmental problems Urban soils are composed of geological material that has been drastically disturbed by anthropogenic activities and compromised their role in the production of food aesthetics of residential areas and pollutant dynamics Properties of urban soils are normally not favorable to plant growth the soils are contaminated by heavy metals and are compacted and sealed Therefore the quality of urban soils must be restored to make use of this valuable resource for delivery of essential ecosystem services e.g. food water and air quality carbon sequestration temperature moderation biodiversity Part of the Advances in Soil Sciences Series Urban Soils explains properties of urban soils assesses the effects of urbanization on the cycling of carbon nitrogen and water and the impacts of management of urban soils soil restoration urban agriculture and food security evaluates ecosystem services provisioned by urban soils and describes synthetic and artificial soils

Vertical Farming Gary Greninger, 2019-10-12 As the world realises the benefits of education more and more people move to cities in search of a better future A future which includes affordable housing health care quality education and inexpensive food However while the other options are possible the pressing question here is if so many people relocate to the cities who will work on the farms then Historically the farms built in rural areas have provided the city dwellers with cheap food However times are changing now Modern agriculturists believe that cities too can produce ample amounts of food In this gripping book we introduce you to modern agricultural technology Vertical Farms A state of the art farm built inside a skyscraper which grows enough fruits and vegetables to feed the entire town This book leads you on an adventure inside a vertical farm explaining how they can be built inside an abandoned building and produce enough fresh fruits and vegetables to feed every person in the city In fact not just the city dwellers but vertical farms can actually feed the astronauts who live on the International Space Station with produce grown on site Small countries like Singapore are already taking advantage of vertical farming With little land water and sunlight they have managed to produce tons of food for its fast growing population If the Singaporeans can do it anyone can do it
