behaviors in ancient Greek and Roman texts and considers the precise language depicting them Individual contributors examine genres ranging from historiography and epic to tragedy philosophy and vase decoration They explore evidence as disparate as Pliny's depiction of animal emotions Plato's presentation of Aristophanes' hiccups and Thucydides' use of verb tenses Sophocles' deployment of silence is considered as are Lucan's depiction of death and the speaking objects of the medieval Alexander Romance Ancient authors' depictions of emotion gesture and nonverbal behavior are intrinsically relevant to psychological social and anthropological studies of the ancient world and are perhaps even more important to those who study the texts themselves and try to understand them The volume will be relevant to scholars studying Greek and Roman society and literature as well as to those who study the imitation of ancient literature in later societies Since jargon is avoided and all passages in ancient languages are translated the volume will be suitable for students from the upper undergraduate level Contributors in addition to the volume editors include Jeffrey Rusten Rosaria Vignolo Munson Hans Peter Stahl Carolyn Dewald Rachel Kitzinger Deborah Boedeker Daniel P. Beyond the Aesthetic and the Anti-Aesthetic James Elkins, Harper Montgomery, 2013-08-20 Each of the five volumes in the Stone Art Theory Institutes series and the seminars on which they are based brings together a range of scholars who are not always directly familiar with one another's work The outcome of each of these convergences is an extensive and unpredictable conversation on knotty and provocative issues about art This fourth volume in the series *Beyond the Aesthetic and the Anti-Aesthetic* focuses on questions revolving around the concepts of the aesthetic the anti-aesthetic and the political The book is about the fact that now almost thirty years after Hal Foster defined the anti-aesthetic there is still no viable alternative to the dichotomy between aesthetics and anti- or nonaesthetic art The impasse is made more difficult by the proliferation of identity politics and it is made less negotiable by the hegemony of anti-aesthetics in academic discourse on art The central question of this book is whether artists and academicians are free of this choice in practice in pedagogy and in theory The contributors are Stephanie Benzaquen J.
