hydropower in half exposed Lake Okeechobee's floor dried 787 million of Georgia's crops and left Atlanta with 60 days of water Cities east and west are drying up As reservoirs and aquifers fail officials ration water neighbors snitch on one another corporations move in and states fight states to control shared rivers Each year inadequate water kills more humans than AIDS malaria and all wars combined Global leaders pray for rain Bushmen tap more pragmatic solutions James Workman illuminates the present and coming tensions we will all face over water and shows how from the remoteness of the Kalahari a primitive by our standards people is showing the world a viable path through the encroaching desert of the coming Dry Age

Crossings James Walvin, 2013-10-15 We all know the story of the slave trade the infamous Middle Passage the horrifying conditions on slave ships the millions that died on the journey and the auctions that awaited the slaves upon their arrival in the Americas But much of the writing on the subject has focused on the European traders and the arrival of slaves in North America In *Crossings* eminent historian James Walvin covers these established territories while also traveling back to the story's origins in Africa and south to Brazil an often forgotten part of the triangular trade in an effort to explore the broad sweep of slavery across the Atlantic Reconstructing the transatlantic slave trade from an extensive archive of new research Walvin seeks to understand and describe how the trade began in Africa the terrible ordeals experienced there by people sold into slavery and the scars that remain on the continent today Journeying across the ocean he shows how Brazilian slavery was central to the development of the slave trade itself as that country tested techniques and methods for trading and slavery that were successfully exported to the Caribbean and the rest of the Americas in the following centuries Walvin also reveals the answers to vital questions that have never before been addressed such as how a system that the Western world came to despise endured so long and how the British who were fundamental in developing and perfecting the slave trade became the most prominent proponents of its eradication The most authoritative history of the entire slave trade to date *Crossings* offers a new understanding of one of the most important and tragic episodes in world history **Is South Africa Too Dumb for**

Africa and the West Godfrey Mwakikagile, 2000 Besides her natural beauty the scenery and the climate and her abundant wildlife and natural resources Africa is probably best known as the homeland of hundreds of millions of people who live in abject poverty Millions are wracked by disease and blinded by ignorance And just as many go hungry every day But there is something else which also distinguishes Africa lack of unity among her people That is one of the main reasons why they were conquered by foreigners and why Africa is still weak and poor today There is no other continent which is endowed with so much in terms of natural resources But there is also no other continent where it has been so easy for foreigners to take what does not belong to them This book began as a self examination of the African personality in an attempt to understand Africa's place in the world especially in relation to the West
