ARMSBY,2018 **The Principles of Animal Nutrition** Henry Prentiss Armsby,2015-07-20 Excerpt from The Principles of Animal Nutrition With Special Reference to the Nutrition of Farm Animals The past two decades have not only witnessed great activity in the study of the various problems of animal nutrition but they are especially distinguished by the new point of view from which these problems have come to be regarded Speaking broadly it may be said that to an increasing knowledge of the chemistry of nutrition has been added a clear and fairly definite general conception of the vital activities as transformations of energy and of the food as essentially the vehicle for supplying that energy to the organism This conception of the function of nutrition has been a fruitful one and in particular has tended to introduce greater simplicity and unity into thought and discussion Much exceedingly valuable work has been done under its guidance while it points the way toward even more important results in the future The following pages are not a treatise upon stock feeding but are an attempt to present in systematic form to students of that subject a summary of our present knowledge of some of the fundamental principles of animal nutrition particularly from the standpoint of energy relations with special reference to their bearings upon the nutrition of farm animals Should the attempt at systematization appear in some instances premature or ill advised the writer can only plead that even a temporary or tentative system if clearly recognized as such may be preferable to unorganized knowledge The scaffolding has its uses even though it form no part of the completed building About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works *The Principles of Animal Nutrition* Henry Prentiss Armsby,1903 **The Principles of Animal Nutrition** Henry Prentiss Armsby,2017-10-18 Excerpt from The Principles of Animal Nutrition With Special Reference to the Nutrition of Farm Animals The past two decades have not only witnessed great activity in the study of the various problems of animal nutrition but they are especially distinguished by the new point of view from which these problems have come to be regarded Speaking broadly it may be said that to an increasing knowledge of the chemistry of nutrition has been added a clear and fairly definite general conception of the vital activities as transformations of energy and of the food as essentially the vehicle for supplying that energy to the organism This conception of the function of nutrition has been a fruitful one and in particular has tended to introduce greater simplicity and unity into thought and discussion Much exceedingly valuable work has been done under its guidance While it points the way toward even more important

results in the future The following pages are not a treatise upon stock feeding but are an attempt to present in systematic form to students of that subject a summary of our present knowledge of some of the fundamental principles of animal nutrition particularly from the standpoint of energy relations with special reference to their bearings upon the nutrition of farm animals Should the attempt at systematization appear in some instances premature or ill advised the writer can only plead that even a temporary or tentative system if clearly recognized as such may be preferable to unorganized knowledge The scaffolding has its uses even though it form no part of the completed building About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works

Animal Nutrition Leonard A. Maynard,1979 *Animal Nutrition* Peter McDonald,J. F. D. Greenhalgh,R. Edwards,C. A. Morgan,Liam Sinclair,Robert Wilkinson,2022 Recent research in the field of animal science has focused on advances in molecular biology particularly in the study of gene expression epigenetics and gene editing and exciting advances have been made However knowledge of animal biochemistry and nutrition is still essential if we are to understand the significance and efficient application of these new findings to further improve animal production health and welfare The application of research and advice in animal nutrition continues to be at the centre of efficient animal production Research in dog and cat nutrition has also progressed since the last edition and information in this area has been expanded in this new edition We have retained the early chapters on basic food chemistry and animal biochemistry to provide a quick reference to questions pertaining to the discipline of nutrition chemistry in later parts of the book We have also taken the opportunity to introduce nutritional topics related to molecular biology and the environment Each chapter now has a set of questions to assist with revision of the chapter topic and the Appendix tables have been revised where new data are available Two significant events have occurred since the last edition In 2016 the British Society of Animal Science recognised the 50th anniversary of the publication of the first edition of *Animal Nutrition* by awarding framed certificates of congratulation to the original three authors Peter McDonald James Greenhalgh and Alun Edwards Then in 2018 came the sad news that Peter McDonald had died Although Peter had not been actively involved in the production of recent editions of the book he had always shown great interest in its progress Fittingly Peter s funeral service was conducted by another eminent animal nutritionist Rev Dr Neville Suttle The production of this edition was assisted by comments and suggestions received from reviewers and we welcome comments from readers As with previous editions we are grateful to colleagues for their helpful discussions
