Detection and Estimation of Working Memory States and Cognitive Functions Based on Neurophysiological Measures Felix Putze, Christian Mühl, Fabien Lotte, Stephen Fairclough, Christian Herff, 2019-02-05 Executive cognitive functions like working memory determine the success or failure of a wide variety of different cognitive tasks such as problem solving navigation or planning Estimation of constructs like working memory load or memory capacity from neurophysiological or psychophysiological signals would enable adaptive systems to respond to cognitive states experienced by an operator and trigger responses designed to support task performance e g by simplifying the exercises of a tutor system when the subject is overloaded or by shutting down distractions from the mobile phone The determination of cognitive states like working memory load is also useful for automated testing assessment or for usability evaluation While there exists a large body of research work on neural and physiological correlates of cognitive functions like working memory activity fewer publications deal with the application of this research with respect to single trial detection and real time estimation of cognitive functions in complex realistic scenarios Single trial classifiers based on brain activity measurements such as electroencephalography functional near infrared spectroscopy physiological signals or eye tracking have the potential to classify affective or cognitive states based upon short segments of data For this purpose signal processing and machine learning techniques need to be developed and transferred to real world user interfaces The goal of this Frontiers Research Topic was to advance the State of the Art in signal based modeling of cognitive processes We were especially interested in research towards more complex and realistic study designs for example collecting data in the wild or investigating the interaction between different cognitive processes or signal modalities Bringing together many contributions in one format allowed us to look at the state of convergence or diversity regarding concepts methods and paradigms

AIRBUS A320. Normal Operation Facundo Conforti, 2021-07-08 Welcome to one of the most advanced versions of the Aeronautical Library In this new work of the AIRBUS A320 series we will know the normal operation of the aircraft during a

real commercial flight from the city of Malaga Spain LEMG to the city of Valencia Spain LEVC The objective of this manual is that each reader knows everything that happens during a normal flight from the time the pilots arrive at the airport prepare the cabin develop the flight and until they reach their destination AIRBUS A320 Normal Operation is the ideal complement to the rest of the A320 collection in all its volumes Each step explained with the most precise detail and graphics of the panels that the pilot will operate in each instance of the flight added to the cartography that should be used for a flight of these circumstances And as an added value all communication structures between the pilot and the controller A practical and entertaining guide how only the Aeronautical Library can offer A subject as complex as the operations of A320 it becomes a simple and enjoyable topic to read in this entertaining and didactic manual A Philosophy of Technology Peter Vermaas, Peter Kroes, Ibo van de Poel, Maarten Franssen, Wybo Houkes, 2022-05-31 In A Philosophy of Technology From Technical Artefacts to Sociotechnical Systems technology is analysed from a series of different perspectives The analysis starts by focussing on the most tangible products of technology called technical artefacts and then builds step wise towards considering those artefacts within their context of use and ultimately as embedded in encompassing sociotechnical systems that also include humans as operators and social rules like legislation Philosophical characterisations are given of technical artefacts their context of use and of sociotechnical systems Analyses are presented of how technical artefacts are designed in engineering and what types of technological knowledge is involved in engineering And the issue is considered how engineers and others can or cannot influence the development of technology These characterisations are complemented by ethical analyses of the moral status of technical artefacts and the possibilities and impossibilities for engineers to influence this status when designing artefacts and the sociotechnical systems in which artefacts are embedded The running example in the book is aviation where aeroplanes are examples of technical artefacts and the world aviation system is an example of a sociotechnical system Issues related to the design of quiet aeroplane engines and the causes of aviation accidents are analysed for illustrating the moral status of designing and the role of engineers therein Table of Contents Technical Artefacts Technical Designing Ethics and Designing Technological Knowledge Sociotechnical Systems The Role of Social Factors in Technological Development Ethics and Unintended Consequences of Technology *How to land any airplane* Facundo Conforti, Landing is a critical phase of flight Together with takeoff they are the two maneuvers where the greatest risk is present and where all the capacities of both the pilot and the aircraft are required This work focuses on the development of landing independently of the plane but considering the different circumstances that can affect this phase of flight A work that proposes to consider landing as a generalized procedure in any airplane giving the reader the possibility of understanding it beyond the aircraft it can fly Landing is landing Whether in a Cessna 152 a Cessna Citation or an incredible Airbus A320 landing will become a constant on each of your flights and in this book we will teach you how to understand it with the help of the experience of international airline pilots with vast experience in hundreds of aircraft *Understanding Digital*
