papers presented at the International Conference on Advances in Steel Structures held on 11-14 December 1996 in Hong Kong. The papers cover a wide spectrum of topics and have been contributed from over 20 countries around the world. The conference, the first ever of its kind in Hong Kong, provided a forum for discussion and dissemination by researchers and designers of recent advances in the analysis, behaviour, design and construction of steel structures. The papers in the proceedings report the current state of the art and point to the future directions of structural steel research. Volume I contains 93 papers on the analysis, behaviour, design and construction of framed structures and bridges, with 90 papers in Volume II dealing with plates, shells, analysis, optimization and computer applications, dynamics and seismic design, fatigue and soil-structure interaction.

Structural Analysis and Detailing in Architecture: Fundamental Concepts and Principles Ruaa Hayder Mohammed Hassan, 2025-10-08. *Structural Analysis and Detailing in Architecture: Fundamental Concepts and Principles* by Ruaa Hayder Mohammed Hassan offers a clear, integrated overview of how structural behavior, material science and architectural detailing shape modern construction. It introduces core concepts: equilibrium, load transfer, bending, shear, torsion, stability, redundancy and buckling, and explains major structural systems such as load-bearing frame, shell and hybrid forms under various loads. Mechanical engineering topics including stress, behavior, shear and bending mechanisms, torsion, fatigue and stress concentration are linked to material performance and failure analysis. The book also provides a concise material science foundation covering metals, polymers, composites, glasses and layered systems while relating internal structure to mechanical properties. A strong emphasis is placed on architectural detailing, joints, connections, reinforcement, finishes and service integration, showing how effective detailing prevents cracking, corrosion, deformation and long-term failures. Additional sections discuss construction phases, global and Iraqi standards and the evolution of structural systems. Supported by diagrams and practical examples, this text serves as a compact, useful reference for students and professionals in civil and mechanical engineering, strengthening understanding of both structural behavior and architectural detailing.
