Manual of Alcoholic Fermentation and the Allied Industries Charles George Matthews, 1902 **Wine Science** Ronald S. Jackson, 2008-04-30 *Wine Science* Third Edition covers the three pillars of wine science: grape culture, wine production, and sensory evaluation. It takes readers on a scientific tour into the world of wine by detailing the latest discoveries in this exciting industry. From grape anatomy to wine and health, this book includes coverage of material not found in other enology or viticulture texts, including details on cork and oak, specialized wine-making procedures, and historical origins of procedures. Author Ronald Jackson uniquely breaks down sophisticated techniques, allowing the reader to easily understand wine science processes. This updated edition covers the chemistry of red wine color, origin of grape varieties, wine language, significance of color, and other biasing factors to wine perception, various meanings, and significance of wine oxidation. It includes significant additional coverage on brandy and ice wine production, as well as new illustrations and color photos. This book is recommended for grape growers, fermentation technologists, students of enology and viticulture, enologists, and viticulturalists. NEW to this edition: Extensive revision and additions on chemistry of red wine color, origin of grape varieties, wine language, significance of color, and other biasing factors to wine perception, various meanings, and significance of wine oxidation. Significant additional coverage on brandy and ice wine production. New illustrations and color photos.

Wine Chemistry and Biochemistry M. Victoria Moreno-Arribas, Carmen Polo, 2008-11-06 The aim of this book is to describe chemical and biochemical aspects of winemaking that are currently being researched. The authors have selected the very best experts for each of the areas. The first part of the book summarizes the most important aspects of winemaking technology and microbiology. The second, most extensive part, deals with the different groups of compounds, how these are modified during the various steps of the production process, and how they affect the wine quality, sensorial aspects, and physiological activity, etc. The third section describes undesirable alterations of wines, including those affecting quality and food safety. Finally, the treatment of data will be considered an aspect which has not yet been tackled in any other book on enology. In this chapter, the authors not only explain the tools available for analytical data processing but also indicate the most appropriate treatment to apply, depending on the information required, illustrating with examples throughout the chapter from enological literature.
