New Developments in Pathways Towards Diversity and Inclusion in STEM: A United States Perspective Alexander Gates, Juan Gilbert, Chris Botanga, Kim Nguyen, Bonita London, 2022-10-17 The Louis Stokes Alliances for Minority Participation LSAMP program of the US National Science Foundation has been a primary force for raising the success and

graduation of minority students in STEM for 30 years Increasing the number of underrepresented students earning baccalaureate degrees and entering graduate school in STEM is the goal of LSAMP This goal has been nearly achieved through the formation of alliances of degree granting institutions of higher learning varying from community colleges to major research institutions Currently there are 59 alliances including more than 400 institutions LSAMP is responsible for more than 650 000 bachelor s degrees earned by minority students in STEM The papers for this Research Topic should focus on the use of LSAMP activities programs and collaborations to develop pathways to success and graduation of STEM majors from minority groups that underrepresented in STEM These pathways can include any segment from pre college through graduate school Areas of special interest include mentoring research experiences transitions between levels and novel approaches for retention The studies should be research based and rigorous They can be pure research studies curriculum and design or literature reviews but they must be at a cutting edge level and be subject to detailed review and assessment

Using Games and Simulations for Teaching and Assessment Harold F. O'Neil, Eva L. Baker, Ray S. Perez, 2016-03-31
Using Games and Simulations for Teaching and Assessment Key Issues comprises a multidisciplinary investigation into the issues that arise when using games and simulations for educational purposes Using both theoretical and empirical analyses this collection examines cognitive motivational and psychometric issues with a focus on STEM content Unlike other research based volumes that focus solely on game design or the theoretical basis behind gaming this book unites previously disparate communities of researchers from civilian to military contexts as well as multiple disciplines to critically explore current problems and illustrate how instructionally effective games and simulations should be planned and evaluated While computer based simulations and games have the potential to improve the quality of education and training Using Games and Simulations for Teaching and Assessment Key Issues shows how the science of learning should underlie the use of such technologies Through a wide ranging yet detailed examination chapter authors provide suggestions for designing and developing games simulations and intelligent tutoring systems that are scientifically based outcomes driven and cost conscious
