adjustments that caused often significant changes to places such as the Nile Delta The curve of inexorably rising seas flattened out as urban civilizations developed in Egypt Mesopotamia and South Asia The earth s population boomed quintupling from the time of Christ to the Industrial Revolution The threat from the oceans increased with our crowding along shores to live fish and trade Since 1860 the world has warmed significantly and the ocean s climb has accelerated The sea level changes are cumulative and gradual no one knows when they will end The *Attacking Ocean* from celebrated author Brian Fagan tells a tale of the rising complexity of the relationship between humans and the sea at their doorsteps a complexity created not by the oceans which have changed little What has changed is us and the number of us on earth
