between different groups of researchers persist In addition limited accessibility to conferences and journals also contribute
to this problem The International Sourcebooks in Mathematics and Science Education focus on under represented regions of

Malaysia and India provides the first synthesized treatment of mathematics education that has both developed and is now
prominently emerging in the Asian and South Asian world The book is organized in sections coordinated by leaders in
mathematics education in these countries and editorial teams for each country affiliated with them The purpose of unique

influenced ongoing research agendas and informed practices in Europe North America and other countries in addition to

countries The book will serve as a standard reference for mathematics education researchers policy makers practitioners and
